**Notes:** We only include respondents in HEDS reports with "valid" responses (ValidHEDS=1). To be considered a valid response, we must have the respondent's graduation year (either institution reported or self-reported), and the respondent must have submitted the survey or made it through Q16 (prep\_conlearn).

We calculated the response rate by dividing an institution's total number of valid responses by the number of emails successfully delivered through Qualtrics. We do not calculate response rates for the authentication method as we are unaware of bounced email addresses.
