Summer 2023

Graylyn Pool The primary goal of this project was to resurface the inside of the pool after many

fixtures, a new ceiling grid, and a fresh coat of paint throughout the locker rooms. Behind the scenes, the pool pump was upgraded and insulated all water pipes in the building to minimize the risk of future breakdowns and increase efficiency. **Welcome to these F&CS Staff Members New Hires Building Services**

years of wear and tear had eroded the surface to the point where it began to chip and leak a significant amount of water. The new surface is designed to last 20-25 years and will be a significant improvement to this historic pool. In addition to the resurfacing we also made several improvements to the pool's bathhouse. Lighting was updated to new energy-efficient LEDs which are also much brighter. The showers received new

Managing Athletics Fields

The Athletic Field Maintenance Team goes above and beyond to make the fields at

Wake Forest University stay in the best optimal condition with a strong focus on turf health, safety and playability. The Athletic Field Maintenance Team has 5

essential steps to keeping the fields ready for play.

START

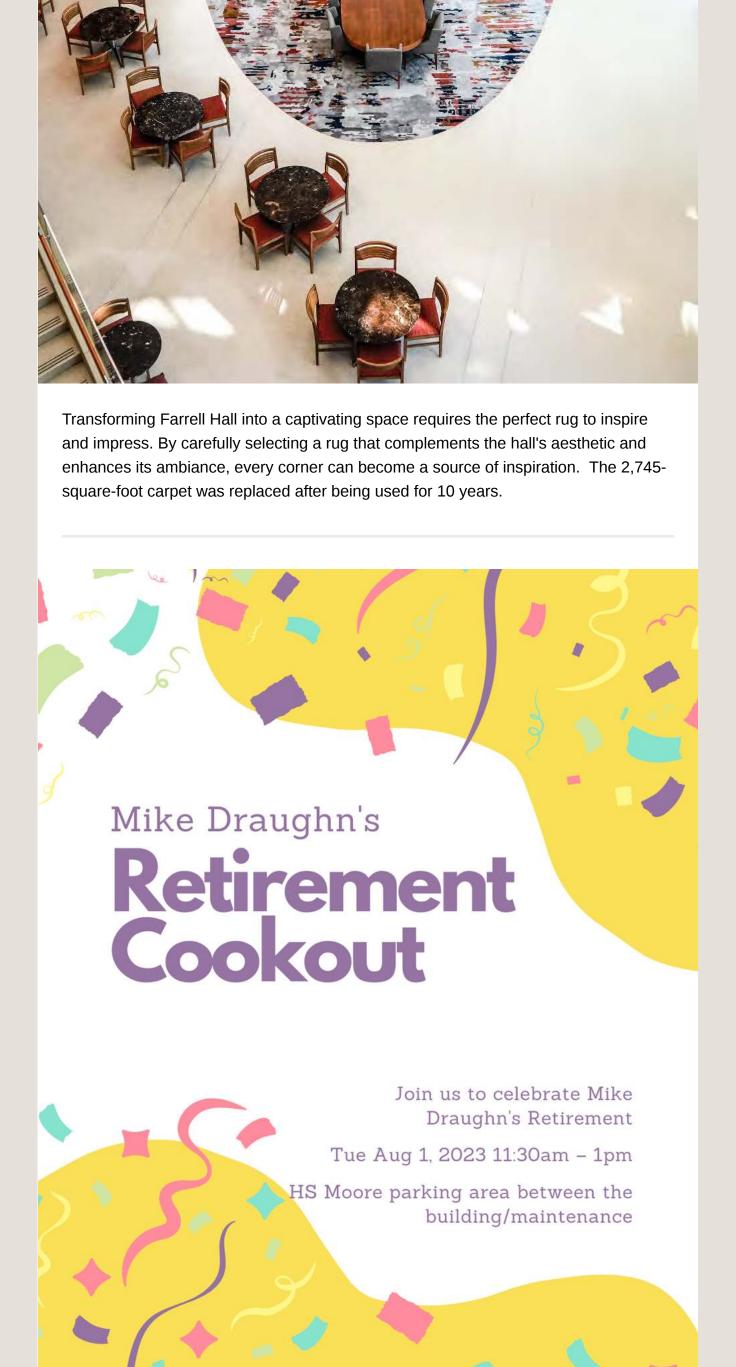

Step 4: Closely monitor turf health, safety and playability.

the best possible condition for coming out of dormancy in the Spring.

Step 5: Provide the field with the proper nutrition prior to winter to ensure that it is in

New Compactor Truck

The 2023 ISUZU Pac Mac 8 Yard is a visually impressive truck that catches the eye as it navigates across the campus. With its high visibility and the inclusion of cameras, it ensures a safer experience for both the driver and those around it. Additionally, its

costs.

fuel efficiency sets a new standard, contributing to reduced emissions and lower fuel

GREEN ZONE

Clothes and shoes may be placed in the white metal bin located in the WFU coal yard. These items will be picked up by a Green Zone driver and turned into new products. Since the start of the program, "The Office of Waste Reduction and Recycling" has collected and diverted 3,500 lbs. of textile waste from ending up in the landfill.
