**CENTER FOR THE ADVANCEMENT OF TEACHING**

Dear Colleagues,

AI continues to capture the attention of faculty, departments, and administrators, so we've been hard at work finalizing the details of a number of major AI initiatives we're excited to share with you today. Thanks to the gift of a generous donor, we will be able to support twenty Peer-to-Peer AI Seminars this summer. We'll also be running a bigger and better AI Institute in May; we put the finishing touches on our long-awaited AI Resources website; and we are currently fielding an all-student survey about AI (with a faculty survey in the works). Each of these initiatives reflects our commitment to supporting a rich community of inquiry among our teacher-scholars. There is still much we don't know about AI and how it will shape the future of education, but we are certain we will all benefit from reading, reflecting, and experimenting together.

-Betsy

P.S. To learn more about the CAT's regularly scheduled programming, including our annual Course Design Institute, check out our March newsletter.

## AI Resource Hub

Our new AI Resources page serves as a central hub for all WFU instructors hoping to gain a better understanding of AI and the questions it raises for their unique teaching context. We will be updating, editing, and adding to this section of the website as new developments in AI are released and the conversation continues. Please continue to check back regularly for updates.

## Peer-to-Peer AI Seminars

Modeled on the successful Peer-to-Peer initiative the CAT facilitated in 2020, this program invites 20 instructors to develop and facilitate AI Seminars for specific groups of their peers. Peer facilitators will receive a $1,500 stipend and $95 per participant for small incentives (food, books, or trial AI licenses). If you are interested in either facilitating or participating in one of these seminars (or both!), please indicate your interest at the link below by **Tuesday, March 26th**.

I'm Interested!

## AI Institute 2.0

Back by popular demand, the CAT will run a second AI Institute on May 14th and 15th. We will re-run all six workshops from the January Institute alongside **six new workshops** as concurrent sessions. Although the new workshops are designed to be deeper dives for previous participants, all are welcome to attend any sessions of interest. Follow the link below to see the complete schedule and register.

## Student & Faculty AI Surveys

The CAT is conducting two campus-wide surveys on AI this spring. The student survey is currently in the field, and we ask that you encourage your students to complete it by sending them to the following URL: go.wfu.edu/aitake. The survey is anonymous and can be taken in 5-7 minutes. Students who complete the survey will have the opportunity to enter a raffle for a Wake Forest Swag package worth $150.00. Faculty who subscribe to our newsletter or register for an AI event will be invited to complete their own survey in April. If you have any questions, please contact Karen Singer-Freeman at singerk@wfu.edu. Interested in the results? Attend the first session of our AI Institute on May 14th!

## Faculty Reflections on AI

Though you probably teach alone, you are not alone in thinking through whether and how to approach AI in your classroom. To help you learn from one another, we're inviting faculty to reflect on their experience and share their advice. We've published our first few [submissions](#), with many more on the way. Please consider adding your own responses to our growing collection.
