

The CAT will be hosting an AI Institute the week before classes begin in January. Join us for all six sessions, or select by area of interest. Diverse perspectives and levels of experience are welcome!

Artificial Intelligence Institute

January 10th - January 11th
Faculty Commons
6th Floor, ZSR Wilson Wing
Wake Forest University

Introduction to AI **Wednesday, January 10th** **12:00 PM - 1:30 PM**

This workshop will introduce participants to the most popular AI tools, their current capabilities, and how they were developed. We will demonstrate the impact of various prompting strategies, explore potential uses in teaching and learning, and share what we know about current use on campus.

Educating for Humanity **Wednesday, January 10th** **1:45 PM - 3:15 PM**

In this workshop, we will explore the relationship between the rapid development of AI, our individual course goals, and the mission of the institution. What will our students need to learn to advance the good of humanity in a world transformed by AI? Which goals retain their relevance? Which do not?

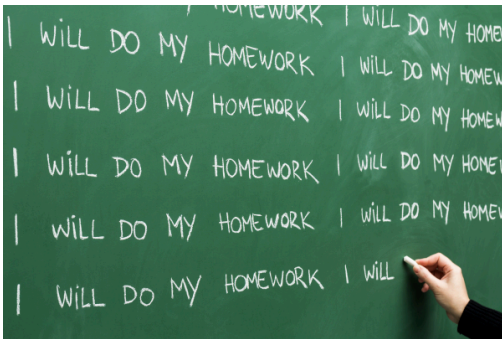

Maintaining Engagement **Wednesday, January 10th** **3:30 PM - 5:00 PM**

We know that transformative learning is most likely to occur when students are actively engaged. In this workshop, participants will learn strategies to minimize the risk of AI-facilitated disengagement while exploring the potential of AI to deepen and extend current levels of engagement.

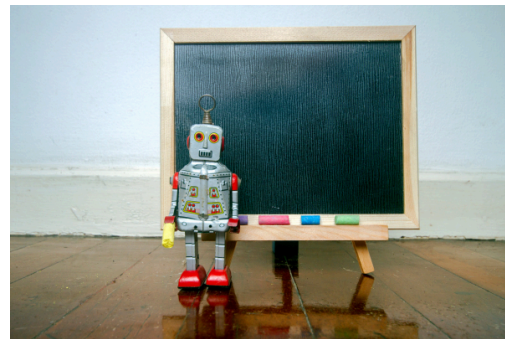

Making Learning Visible **Thursday, January 11th** **12:00 PM - 1:30 PM**

To teach well, we must monitor our students' progress and adjust when necessary. We design assignments that make learning visible and are rightly worried that AI-generated work will distort this observation. In this workshop, participants will explore alternative assignments to minimize this risk.

Motivating Integrity **Thursday, January 11th** **1:45 PM - 3:15 PM**

If some uses of AI undermine learning and assessment, we must work to prevent such use. In this workshop, we discuss the challenges AI creates for traditional strategies (detection and punishment) and propose a number of alternatives that leverage what we know about student motivation to cheat.

The Future of Teaching **Thursday, January 11th** **3:30 PM - 5:00 PM**

In the closing session of our institute, we'll focus on our own work as teachers. We'll explore how AI can improve our practice, while acknowledging the risk of outsourcing teaching tasks to machines. We'll propose strategies that enhance our pedagogy while retaining the human core of our work.
