WFU Research Fellowship Application 21-22

Q1
Wake Forest Research Fellowship Application

Application Deadline: February 18, 2022. A mentor endorsement form will be emailed automatically to your primary mentor once your application is submitted. Please direct any questions to Acacia Fike-Nelson (fikenea@wfu.edu).

This application will collect some basic information about you and a description of your project. It is expected that you will discuss your project with your faculty mentor(s) and that they will provide guidance on the application. At this time, it is assumed that students will be allowed to be on campus for the summer of 2022, and your project should reflect in-person mentorship. Be sure that your project description includes the following: Justification for your scholarly project (including Project Background, Rationale and Significance; 500 words maximum).
        A detailed description of your Project Methods (500 words maximum).
        Describe how this fellowship will benefit your educational and/or career plan (250 words maximum).

Reminder*:* The Wake Forest Research Fellowship requires that students work full time on their projects. That is to say, students receiving this fellowship may not work outside the fellowship nor enroll in summer courses during the 10 consecutive weeks of the summer fellowship. Summer project dates should begin and end between May 17 - August 16, 2022.

            All equipment purchased for research must remain with the mentor as the department or lab's property, used as a resource for future research and/or study.

2022 Update: We anticipate awarding fellowships to undergraduate students for summer 2022. However, students should discuss with their mentor the possibility of whether a remote project would be possible in the event that the campus closes for the summer. Should there be a university update prohibiting on-campus housing during the summer, we will communicate with fellowship recipients and their mentors accordingly.

  *************Applicants may upload their responses in the form of a PDF document. The final question will allow applicants to upload a PDF document containing responses to the Project Description questions.*************

Q19 **Project description: To be completed by the student applicant**

 This proposal should be written by the student using language that can be understood by a lay reader. The student's project background section should state the broad scholarly program under study and its potential applications. The second section of the application should describe the design and methods to be used in the project. It is expected that the faculty mentor will discuss the project and provide guidance on the application. Please include in
the discussion how your project could change if we need to go remote during summer of 2022.
