

Members

Bio Careers® is the only online career service to focus exclusively on the needs of life science postgraduates, Postdocs and MDs.

It is also the only one to represent training institutions, with 40 of the top 60 training institutions in the U.S. participating. The alumni from these programs constitute over 70% of our jobseekers.

Job Board

Bio Careers® boasts the top job board for life science postgraduates in the U.S. with over 1500 listings.

Many career paths: academia, biopharma, government research, consulting, environmental science, science policy, science writing and many more.

Anonymous resume posting:

- Post your resume and we'll list it without your contact information.
- When an employer is interested, they'll contact you through the system.
- Then, choose whether to release your contact details. A win-win for employers and candidates.

Career Search Materials and Tools

By focusing on the needs of advanced scientists and clinicians, Bio Careers® has built the most focused, richest career materials and tools available on the internet.

Career articles on over 100 relevant career paths, written by PhDs and MDs who have made the transition.

Deep collection of videos on career paths and job search.

An active blog staffed by over 40 career experts to stimulate thinking and answer questions.

Career tools to help jobseekers decide among dozens of career paths.

A bookstore of recommended reading, from Scripps, Stanford Medical School, and UCSF's career center libraries.
