Statement on 2019-2020 Senate Voting Records

Per Article IV Section 4 of the Student Government bylaws (found here), the voting records of all Senators are public knowledge. These are to be recorded by the elected Secretary who has one week to provide them to the chairs of the Public Relations Committee of Student Government at which point the records are to be published on the Student Government Website.

Unfortunately, prior to both the 2020-2021 Executive Board’s swearing in and the appointment of PR committee chairs, some transition documents were permanently deleted. Among these documents were the voting records for the Spring 2020 legislative session. As of this statement’s writing, no member of Student Government has been able to recover the voting records and no additional copies have been found.

We recognize that the deletion of such documents impedes our ability to abide by the provisions of our Bylaws. Moving forward, the Executive Board is working to ensure that multiple copies of important documents are kept and passed down at the end of each year.

Despite these impediments, all legislation debated on the Senate floor from the 2019-2020 academic year has been published. With these documents is the outcome of each piece of legislation’s vote, whether the legislation passed, failed to pass, or was tabled.

Though we cannot update the voting records at this time, be assured that all future votes will be recorded and published in accordance with the Bylaws.
