We are excited to present to you some very strong college talent. You will find our students to be excellent communicators, good critical thinkers, effective problem solvers, and very diligent workers.

In this guide we proudly present to you the excellent programs within the College and the School of Business. From the list included in this guide, we hope you will find a robust cross section of talent to best meet the needs of your organization.

We also take great pride in providing excellent consultation and service to our employer partners as they seek to find the right talent for their organizations. We will always go the extra mile to create employer partnerships that are long lasting and mutually beneficial.

Our Employer Relations staff is standing by ready to assist you with your talent acquisition needs. We hope you’ll engage with us and make Wake Forest a destination school for your college recruiting!

Wake Forest University Employer Relations
Wake Forest College stands as the cornerstone of Wake Forest University. It honors the ideals of liberal learning, which encourages habits of mind that ask “why,” that evaluate evidence, that are open to new ideas, that attempt to understand and appreciate the perspectives of others, that accept complexity and grapple with it, that admit error, and that pursue truth.

The College believes in the development of the whole person and is committed to sustaining an environment where beliefs, assumptions, and ideas are examined thoughtfully and critically in a climate of academic freedom.

Wake Forest College offers a wide range of majors including art history, biology, communication, computer science, economics, education, health & exercise science, international studies, mathematics, statistics, and many more.

In 2017, courses of study in Engineering, Biochemistry and Molecular Biology, and Medicinal Chemistry and Drug Discovery were rolled out which will lead to B.S. in Engineering and B.S. in Biochemistry and Molecular Biology degrees.
MA IN MANAGEMENT – Designed specifically for graduates from the liberal arts, sciences, and engineering fields. The 10-month Masters in Management program transforms smart, broadly educated critical thinkers into business professionals who are ready to provide unique value to their organizations.

This is accomplished through a rigorous, accelerated, and applied education on the fundamentals of business. In class concepts are further reinforced via two consulting engagements providing our students with valuable hands-on experience and opportunities to develop their teamwork skills.

MS IN BUSINESS ANALYTICS – In its second year, this program teaches students advanced methodologies and how to apply analytics to business challenges across a range of functions. It develops problem solvers who can take data from insight to impact and add value from day one.

BS IN BUSINESS – This ranked program exposes business students to a world of opportunity, providing them with the chance to develop the skills and experience that employers are seeking. Students benefit from team-based learning, professional development, hands-on experience, leadership opportunities, and study abroad programs in Accountancy, Business and Enterprise Management, Finance, and Mathematical Business.

MS IN ACCOUNTANCY – Highly recognized and well-respected for rigor and results, leading companies come to Wake Forest for the talent they need. The program’s historically high CPA pass rate and reputation with leading firms enables us to consistently place 100% of our students into jobs at graduation.

THE MISSION OF THE WAKE FOREST SCHOOL OF BUSINESS IS TO SHAPE THE WHOLE PERSON. WE HELP BUSINESSES CREATE A BETTER WORLD BY DEVELOPING PASSIONATE, ETHICAL BUSINESS LEADERS WHO GET RESULTS WITH INTEGRITY AND THOUGHT LEADERSHIP.
The Graduate School of Arts and Sciences is one of the engines of creativity of Wake Forest University. Our hallmark is world-class scholarship fueled by an interdisciplinary, collaborative environment. Whether it is a traditional liberal arts approach, or cutting edge training in biomedical innovation, our small size ensures that students have individual attention, tailored advising and research opportunities well-matched to their interests.

Our programs span the full range of the liberal arts and sciences and the biomedical sciences. We house 30 master’s and PhD disciplinary or interdisciplinary programs and sponsor 12 programs with the schools of Medicine, Business, Divinity, and College.

**THE MISSION OF THE WFU GRADUATE SCHOOL OF ARTS AND SCIENCES IS TO TRAIN AND MENTOR FUTURE LEADERS IN RESEARCH, TEACHING AND INNOVATION FOR SERVING HUMANITY.**
The goal of Employer Relations is to make recruiting talent both convenient and productive for every organization. Regardless of your size or recruiting needs, we can connect you with our students through the following:
