EDITOR’S NOTE:
This issue of Wake Forest Magazine marks the end of an era. President Nathan O. Hatch will retire June 30 after 16 years leading the University through the highs of expanding Wake Forest’s opportunities for faculty, students and staff at home and abroad and the universal low of facing a pandemic for which there was no leadership playbook for anyone anywhere. You will read about highlights of his legacy and the gratitude and respect he has engendered in his work on behalf of the University and its people. The Wake Forest Magazine staff is grateful for his unwavering support of the work we do and joins the many well-wishers celebrating his tenure and that of his wife, Julie. May their journey ahead be filled with joy and pleasant memories of Mother So Dear.
— Maria Henson (’82)
Embracing values, tradition and innovation, retiring President Nathan O. Hatch challenged his team and Wake Foresters to make history.
was 14, John F. Kennedy and Richard M. Nixon traveled to his hometown of Columbia, South Carolina, to campaign for the presidency. Captivated by politics and prompted by curiosity, the teen attended the presidential rallies to take in both perspectives. On a trip to Washington, D.C., with his parents, the young Hatch peered over the railing of the gallery to catch a glimpse of Congress attending to business. His senior project in high school was studying Kennedy’s senatorial career. He wrote to the White House for some information and photos for his assignment, and he received a package in return. It was postmarked Nov. 22, 1963 — the day Kennedy was assassinated.
was always interested in history, Hatch said. “I knew I wanted to study history in college, and my father was an educator, so I thought I would pursue history and education.”

For decades, he took his trade — inspection and analysis of people and culture — to classrooms as a history professor. His enthusiasm for his discipline was bested only by his commitment to students. History was the topic, but he was teaching young people — with whom he built lasting relationships, shared deep conversation and swapped wit.

In 2005, as provost of the University of Notre Dame since 1996, he was cleaning out his house in South Bend, Indiana, to move to Winston-Salem. He came across a note from one of his former students. “If I only had 10 minutes to live,” the student wrote, “I would want to spend it in your class.” It went on to add, “It would seem like an eternity!” — making the former professor throw back his head and laugh.

Hatch, 75, is preparing to clean out his house again, this time the President’s Home in Winston-Salem. He retires on June 30, after serving 16 years as the 13th president of Wake Forest, with his wife, Julie, whom he calls his “biggest support and best critic,” by his side. They plan to remain in Winston-Salem to be near family.

When history looks back upon the Nathan Hatch era in Wake Forest’s story, it will boast a list of successes for the University. But history isn’t just a chronicle of achievements, a calendar of dates, a tally of names or a recitation of facts; it is the story of human beings. And the last 16 years will show the influence of a leader of character with an infectious laugh, quick wit and never-ending curiosity; a steely competitive streak
yet no need for credit; a humble desire to serve; and a deep love of people.

The accomplishments of the Hatch era — substantial and broad-ranging — stem from a vision Hatch shared as he stood behind the podium in Wait Chapel on Oct. 20, 2005.

“Above all, students today long for one thing: to narrow the gap between the ideals we profess and the lives we lead. They are looking for models of how to integrate the often-incoherent facets of their lives,” said the newly inaugurated president. He laid out a concept of a community rooted in engaged learning, the ambition of diversity and a commitment to service and faith.

“Let us rekindle Wake Forest’s finest tradition: a face-to-face community, grounded in the liberal arts, passionate about professional education and committed to living out the values we profess as individuals and as a community,” Hatch said.

At Wake Forest, he began translating his knowledge as someone who had spent his entire career in higher education and as a renowned scholar of the history of religion in America into a strategic plan for Wake Forest to strengthen its position as the nation’s premier “collegiate university.” In his view, that meant balancing the personal attention of a liberal arts college with the academic vitality and broad opportunities of a research university, with values at the heart of the mission.
“ABOVE ALL, STUDENTS TODAY LONG FOR ONE THING: TO NARROW THE GAP BETWEEN THE IDEALS WE PROFESS AND THE LIVES WE LEAD. THEY ARE LOOKING FOR MODELS OF HOW TO INTEGRATE THE OFTEN-INCOHERENT FACETS OF THEIR LIVES.”

—Nathan O. Hatch
The Hatches welcome Wake Forest trustees into the President’s Home.
Jonathan Lee Walton (D.D. ’15), dean of the School of Divinity

“One thing about Nathan is he loves the hunt,” said Hof Milam (’76, MBA ’91, P ’00, ’04), executive vice president. “He doesn’t like to lose people, but he’s reenergized by the hunt. It really brings out his competitiveness, and it plays to one of his strengths, which is identifying talent.”

Just a few years ago, Jonathan L. Walton, then a professor and minister at Harvard University, opened up his calendar one evening to look at what was planned for the following day. “Coffee with Nathan Hatch.” He called his assistant to see what that was all about.

“My assistant said she got a call from Nathan Hatch asking if I would be available for coffee,” said Walton. “It struck me. The president of Wake Forest went through such official protocols? It says something about him; it says something about his level of professional and vocational humility. He wears power loosely.”

Early on in his presidency, Hatch distinguished himself as a magnet for talented leaders and has since summed up his philosophy: “Hire visionaries.” In his years in administration, he scanned the horizon of higher education for promising up-and-comers. Using his power of persuasion and a habit of betting on people not strategy, he recruited an all-star team to guide Wake Forest.

“You don’t advance without great leaders,” Hatch said. “I’ve never seen a unit, department, school or university advance greater than the quality of their leadership. So, you have to recruit above your playing weight. You have to try to outdo your own expectation on hiring.”

Most of the Reynolda Cabinet members who have come to Wake Forest during Hatch’s tenure can recount the president spotting their potential and encouraging them to use their gifts freely.

“We can have excellent academics and at the same time educate people how to live — that is, how to live lives of purpose and meaning that’s beyond themselves,” he has said. “That really fulfills the primary purpose of a university.”

He approached this work, and all that was to come, with an expectation for excellence without pretension, a commitment to collaboration and teamwork, and a hearty dose of goodwill, humor and coffee.

“One thing about Nathan is he loves the hunt,” said Hof Milam (’76, MBA ’91, P ’00, ’04), executive vice president. “He doesn’t like to lose people, but he’s reenergized by the hunt. It really brings out his competitiveness, and it plays to one of his strengths, which is identifying talent.”

Just a few years ago, Jonathan L. Walton, then a professor and minister at Harvard University, opened up his calendar one evening to look at what was planned for the following day. “Coffee with Nathan Hatch.” He called his assistant to see what that was all about.

“My assistant said she got a call from Nathan Hatch asking if I would be available for coffee,” said Walton. “It struck me. The president of Wake Forest went through such official protocols? It says something about him; it says something about his level of professional and vocational humility. He wears power loosely.”

Over coffee, Hatch shared his admiration for the work Walton had done and asked a simple question of the native Southerner: “Don’t you want to come back home?”
Some leaders are so strong — their force field so unremitting — that they do not give others enough space to exercise their own creativity and vision.

— Nathan O. Hatch
If finding the right leaders is the first critical step, developing a cohesive, well-functioning team is a close second.

“One of Dr. Hatch’s superpowers is encouraging very talented people to operate as one team in service of a worthy cause,” said University Trustee Jim O’Connell (’13).

“He leads from behind, and he’s able to do that because he puts the moral ideal up front,” said Walton, now dean of the School of Divinity, Presidential Chair of Religion and Society and dean of Wait Chapel. “He gives you a vision. He gives an ideal, values and a commitment. He establishes the terms and the parameters, then he celebrates the ideas and those who generated the ideas and those who executed the plan. He’s always celebrating.”

Hatch is known to deflect personal credit, leading in a way that made it possible for teammates to shine while shaping their own areas of responsibility. “Some leaders are so strong — their force field so unremitting — that they do not give others enough space to exercise their own creativity and vision,” Hatch wrote in a 2013 article with advice for hiring good people.

When necessary, Hatch put himself out front. He knows teams run on honesty and trust, and that cultivating a strong team rested on him. A few years into his presidency, Hatch asked 25 people at Wake Forest to evaluate him.

“It was very revealing, very challenging, very bracing,” Hatch said of the candid feedback. “But you don’t get better if you pretend everything is perfect.”

The next year, Hatch invited his cabinet to engage in the same intense evaluations, but not before he laid bare his strengths and weaknesses to the group.

“It had to start with me,” said Hatch, “so I gave a pretty unvarnished view of what people said about my leadership.”

His approach has proved inspiring. “What pushes me, what goads me, is the desire to be excellent,” said Dean of the College Michele Gillespie, who served on the Presidential Search Committee that selected Hatch for the presidency. “I’ve learned that from President Hatch. I’ve taken more risks in my teaching and my own career than I would have if I hadn’t come into his circle. He emboldened me to challenge myself in new ways, to strive to be my very best and to invite the same of others.”

IN THE FALL OF 1967, Julie Gregg, a junior transfer at Wheaton College in Illinois, sat down to listen to the presenters at the activities fair. At the podium was a senior describing his summer spent serving in Chicago’s Cabrini-Green housing project.

“I have a hard time saying this with a straight face,” Julie recalls, laughing, “but our eyes met, and something was just different.”

After the program, Nathan Hatch approached Julie and introduced himself. Several weeks later, they had their first date and after a year got engaged.

Once they married, Julie taught elementary school, while Nathan pursued advanced degrees at Washington University and post-doctoral fellowships at Harvard and Johns Hopkins universities. They spent time in St. Louis, Baltimore and Cambridge, Massachusetts, before settling in South Bend, Indiana, at the University of Notre Dame, where he taught history and rose to provost. They had 30 years of roots planted in that small Midwest town before an offer from Wake Forest called them south.

As they were moving to Winston-Salem, the Hatches’ first grandchild was born. Now, there are eight people in the world who know Nathan Hatch as simply one thing. He’s not a scholar, not a president and not a leader of national recognition; he’s Granddad. And Julie is Grammy.

Before he started putting teams together in his professional life, Hatch had an original team — Julie and children Gregg, Dave and Beth. Over the years, that team has grown to include spouses and eight grandchildren — James, Grace, Edie, Ben, Charlie, Julia, Ellie and Lucy, who range in age from 2 to 15. Another baby is due any day in Winston-Salem. (With their children, Gregg and Kathy live in Seattle, Dave and Cassie in Charlotte and Beth and Jonathan Hilliard in Winston-Salem.)

At Christmastime, Hatch climbs the stairs to the attic at the President’s Home and sets up an old-fashioned train to run when the grandchildren visit. He spends the year picking out new parts so it will look different each year. At night, there’s no one better at coming up with an engaging bedtime story.
than Granddad. He crafts elaborate tales and never runs out of plots.

“One of the really fun things for me has been watching my dad through the eyes of my daughters, who are impressed not by any new initiative at Wake Forest, but by the quality of the bedtime story that he can make up for them,” said Gregg, the oldest of the Hatch children. “As one of our girls said after watching him talk to a group of people at a Wake Forest event: ‘It’s too bad they all know him as Dr. Hatch and not as Granddad!’”

In the midst of the craziness of their lives and work, the Hatches try to stay grounded. Nathan plays basketball; Julie walks — fast. Nathan reads, and Julie speaks with her two sisters every morning. They love watching movies, visiting the family cabin in Idaho each summer and having long meals and good conversation with friends.

“The thing that stands out to me most about my dad is how grounded and unpretentious he is,” said Dave, the Hatches’ middle child. “No matter the setting or the company, he has always remained the exact same person to his family, friends and anyone with whom he spends time.”

Their family keeps the Hatches steady, as does their Christian faith.

“Faith has been a huge part of what they’ve given us,” said their daughter Beth. “Also, their strong marriage. No one is without struggles or hard things, but they really love each other in a way that has given us security and a wonderful example.”

Together, the Hatches have approached the last 16 years with great partnership.

“That’s the highlight of this job for me — the teamwork,” Julie said. “It’s been amazing to come into this work and do it together.”

Her husband agreed. “We have been a real team. An institution gets far more if there’s someone like Julie who is willing to take on the role. She is my biggest support and best critic.”

And then there is the humor from the man who is quick with a quip.

“I think our favorite thing is when my dad gets laughing about something; it’s usually a joke he’s told,” Beth said. “He has a very distinct laugh, and we’ll laugh at him laughing.”

Granddaughters Lucy, Ellie and Julia summed it up best: You don’t really know him until you’ve heard him laugh.

“**I think our favorite thing is when my dad gets laughing about something; it’s usually a joke he’s told.**”

—Beth Hilliard
During the Wake Will Lead campaign, Hatch visits cities across the country, including this trip to New York City, to share his vision for Wake Forest.
“Bracing” assessment describes not just the personal evaluation of Hatch but underscores the way the president examined Wake Forest as a whole from the beginning.

“You can’t improve if you don’t admit where you are,” Hatch said. “At Wake Forest, we have to compare ourselves to the best, and then decide where can we be excellent where others can’t be.”

As a historian, Hatch got into the habit of analyzing a culture and its trajectory — being “a diagnostician of one’s environment,” he says. As an administrator, he sought to acquire “a nose for stale air” that businessman and writer Max de Pree felt essential in a leader. As president, he has developed what former University of Florida President John V. Lombardi called “a sixth sense about opportunity — being ready to open the door before the knock is heard.”

At Notre Dame, Hatch’s drive toward distinction started with his somewhat unorthodox entrance into administration. In his first assignment, he was given near carte blanche to fulfill a single directive: Make us better. What followed was unfettered collaboration that propelled innovative ideas — mostly around faculty development in those early years.

At Wake Forest, that directive is something he still can’t shake. He’s always asking that familiar question: How can we be better?

“He has an innovator’s heart,” said Andy Chan, vice president for innovation and career development.

“There’s a restlessness with the status quo,” said Provost Rogan Kersh (’86). “There’s always a sense that around the next bend, there might be something better. Nathan inspects an opportunity in all its dimensions, imagines a solution and then doesn’t rest when it works, but pushes for the next iteration. He does it with a remarkable steady energy.”

Reid Morgan (’75, JD ’79, P ’13, ’14, ’19), the University’s senior vice president and general counsel and a Wake Forester who has worked with Hatch and the two presidents before him, offered a similar view. “He is very alert to opportunities, very alert to trends,” he said. “He’s a student of modern American higher education and modern society. He put all of those things together to think about how we should do things at Wake Forest. What’s coming our way? What’s next?”

“He’s an instinctive listener. Not only is he listening and hearing you, he’s working out how to make things better.”

— Jermyn Davis (’10)
During his tenure, “What’s next?” and “How can we be better?” led him to emphasize overarching themes as the foundation for change: Wake Forest’s distinctiveness as “radically traditional and radically innovative;” its role as a collegiate university; its mission to educate the whole person; its emphasis on the teacher-scholar model; its mandate to be “academically superb and deeply personal” and its Pro Humanitate motto, which places a greater purpose behind a Wake Forest degree.

Hatch may be known for his modesty in taking credit, but the accomplishments and changes he oversaw created a legacy to make Wake Foresters proud. He directed completion of the University’s master plan to ensure that the physical development of the campus would match strategic goals; it is meant to guide the University’s evolution over four decades. His administration added or renovated more than 1 million square feet of space and infused more than $625 million in the University’s commitment to offering the best residential college experience in the country.

What has that meant for Wake Forest? Among the projects were Farrell Hall for business education, the Porter B. Byrum Welcome Center, the Sutton Center addition to Reynolds Gym, the Haddock Golf House, McCreary Field House, the Sutton Sports Performance Center and Shah Basketball Complex, a new home for the Department of Health and Exercise Science, four new residence halls, a new North Dining Center, the transformation of an outdated Reynolds Gym into a vibrant center for wellbeing, and renovations for a number of dorms and sections of Worrell Professional Center and Z. Smith Reynolds Library.

His leadership guided the combining of the undergraduate and graduate business schools into one powerhouse enterprise. It brought the University acclaim as the first top-30 national university to no longer require prospective students to submit SAT or ACT scores with their applications. It expanded academic scholarships and offerings, adding eight majors and 10 minors, and created 10 endowed Presidential Chairs for faculty. It turned career services into the nationally recognized Office of Personal and Career Development to better equip students to navigate the path from college to career. It transformed old, worn-down tobacco warehouses into sterling science facilities at Wake Downtown. It planted flags for Wake Forest studies in Copenhagen, Silicon Valley, Charlotte and Washington, D.C. It led to a partnership with Atrium Health in charting the future of health care and medical education in the region. Fueling the efforts and higher aspirations was a historic, decade-long, $1 billion capital campaign overseen by Hatch and Vice President for University Advancement Mark Petersen.
“HE HAS AN INNOVATOR’S HEART.”

–Andy Chan
Talking trash, scoring on the hardwood

NATHAN HATCH PULLED the laces tight on his plain white tennis shoes. First the right, then the left.

“He has a pair of decade-old sneakers,” said Jim Dunn, CEO of Verger Capital Management and former assistant to Hatch. “They’re just white Nikes. They’re perfect; they’re orthotic; they’re worn in. And he’s worn the same pair for 15 years. His sneakers are consistent … like his jumper.”

On this Saturday at 7 a.m., prior to the COVID-19 pandemic, Hatch was the first to arrive at the gym, carrying water for the others who would join him shortly for the weekly pickup game.

Players began to trickle in, lacing up their shoes and gathering on the court. They passed around “good mornings” and small talk in between stretching, jogging and taking practice shots. The epic play of last week was revisited — like anglers regaling each other with tales of the big fish.

The men divided themselves into two teams, and the first game-to-7 of the morning began. Pick-and-roll plays, jumpers from behind the arc, the offensive rebound and putback, an occasional steal, light taunting, drives to the hoop, teamwork. All on display.

“He’s a sharpshooter and makes more shots than most everyone on the court,” said Andy Chan, vice president of innovation and personal and career development. “His teammates want him to take the final shot because he’s going to make it.”

“He’s got the best midrange jumper I’ve ever seen,” said University Trustee Jim O’Connell (’13). “Smooth as butter! It’s something to see.”

The first game was a tight match, but in the end, Hatch, a guard on his high school team, was smiling.

“Sometimes you forget he’s one of the world’s most renowned religious historians,” Dunn said. “We’ll take a break for water, and he’ll start talking about something in the Vatican II accord.”

Before muscles cooled down, the men returned to the hardwood. At 6-foot-2, Hatch can peek over most other players’ heads. From there, he has a clear view of the court.

“He’s a big man who can pass in ways that make his teammates better,” said Provost Rogan Kersh (’86). “He gets you the ball in a position to succeed. He will pass up his shot to give someone else chances, but as you get to crunch time,” Hatch is going to shoot.
And he's going to talk trash.

"The best two smack talkers on the court are Nathan and Dr. Michael Sloan (associate professor of classical languages)," Dunn said. "Nathan will smack talk while he's playing, and then while he's watching. When I first got there, I didn't foul the president, didn't steal the ball from the president, didn't block his shot. But he talks so much, sometimes you have to!"

"It's part of the fun," Hatch admitted, with a smile.

For the humility he exudes in his life, there are glimpses of his competitive side.

"Don't let him fool you. He's not that humble," Dunn said. "He's very competitive. If he loses two games in a row, he's like, 'We're going to play a third game.' "

And that means breakfast is a little later that Saturday.
While the accomplishments reflect a bold and zealous attitude, Hatch didn’t operate in a manner to overrun people. Besides building a team and letting the members run with their creativity, he employed his gift for deep listening in weighing decisions.

When negotiations about merging health systems hit a snag; when emotions were running high about the influence of the Power Five conferences in the NCAA’s Division I, which Hatch was leading at the time; when the Atlantic Coast Conference sought to welcome new members into the fold, Hatch went to his leadership arsenal and pulled out his most valuable weapon: his ability to listen.

He has driven hours to meet leaders at their homes to hear their honest opinion on a situation. He has gathered people around his kitchen table to find a solution to a complex issue. And he has picked up his phone hundreds of times to ask: “What do you think?”

“He’s an instinctive listener,” said University Trustee Jermyn Davis ('10). “Not only is he listening and hearing you, he’s working out how to make things better.”
Davis recalled how in 2010, when former Wake Forest professor Maya Angelou (L.H.D. ’77) received the Presidential Medal of Freedom, he and Hatch traveled to Washington, D.C., for the ceremony, road-tripping up and down the interstate together.

“That conversation,” said Davis, then a Wake Forest Fellow, “we talked about growing up. We talked about our life progression. We talked about religion and faith and family. We had overlaps, but we were also very different. That conversation is something I will never forget.” The times with Hatch and the fellowship program Hatch established to introduce new alumni to possible careers in higher education were catalysts for Davis’ choice to work in higher education consulting.

In 2017, when American society was growing more and more polarized, Hatch launched Call to Conversation, which became a national movement where Wake Foresters gather for meals and simple, moderated conversations. He knew that people, institutions and communities could be more productive if they took the time to get to know one another.

“I learned from my father that to enjoy an examined and fulfilled life,” said Hatch, “it had to be taken seriously, and the people in our life had to be respected and honored — regardless of how we may align with their view.”

His actions, especially with students, show his desire to know people — to respect and honor them. More than a few times, Hatch invited groups of students to enjoy a cup of coffee over good conversation. At the President’s Home, the Hatches converted their garage into a cozy living room for students that hosted nearly 90 events a year — prior to the pandemic — including movie nights, game-watching parties and an occasional book club with the president. At move-in day in August 2018, Hatch sat in a ball pit to answer questions from incoming students.
In February 2020, Hatch joins Winston-Salem State University Chancellor Elwood L. Robinson at the podium as community leaders mark the 60th anniversary of the Winston-Salem sit-in, led by students from both institutions, to protest segregated lunch counters in the city.
When members of the campus community felt forgotten, Hatch listened to their experiences, heard their concerns and tried to understand what it might be like to walk in their shoes. Many times, those conversations led to Hatch inviting others on campus to join him in taking action. He established three Presidential Commissions to address needs of the LGBTQ community, enrich all students’ first-year experience and face issues related to race, equity and community — all of which have worked toward making Wake Forest a more welcoming place.

He listened and assessed Wake Forest’s relationship with its past. On Feb. 20, 2020, during Founders’ Day Convocation, Hatch unequivocally apologized, on behalf of the University, for how Wake Forest had participated in and benefited from the institution of slavery.

“We needed to do that,” Hatch said simply. “We just wanted to do it in the best way for our community.”

If a conversation wasn’t possible, Hatch used his pen to address concerns in the community, nation and world.

“Every time something comes out that has a national impact, Nathan Hatch will write something about it, and he takes a firm and moral position,” shared Herman Eure (Ph.D. ’74, P ’23), vice chair of the board of trustees and professor emeritus of biology. “That’s consistent with what we should be doing with Pro Humanitate. He lives it, as far as I’m concerned. We don’t always agree on everything, but he is a moral and honest person whose values are deeply entrenched in doing the right kinds of things. That to me is the epitome of what a college president should be doing at any university.”

Hatch sought to invigorate what he saw as “noblest in our heritage” when he supported the establishment of the Program for Leadership and Character in 2017. He told trustees that a commitment to character “is a chief expression of Wake Forest’s soul. … Character is not an abstract concept; it is the embodiment of our everyday life, expressed in small acts, nurtured in ordinary and extraordinary ways. It is being courageous and compassionate, generous and just. It is recognizing that honor is not simply about following a code, but treating others with fairness, dignity and respect. It is seeking excellence not only of mind, but of spirit. It is not only knowing what is good but nurturing the desire to do it.”

(Continued on page 28)
IN AUGUST 2012, Nathan Hatch’s national peers tapped him to chair the NCAA Division I board of directors during a turbulent time for college athletics and its highest level division. “We were in a free fall,” Kevin White, former Notre Dame athletic director and current athletic director at Duke University, said of Division I. “We were the most vulnerable in our history. The whole organization was ready to combust. It was a mess.”

On the line was whether the wealthier “Power Five” conferences — the ACC, Big Ten, Big 12, Pac-12 and SEC, plus independent Notre Dame — would stay in the NCAA. These 65 schools had greater revenues — from television and bowl revenues and football and basketball attendance — and desired more freedom to direct their resources to athletes, but their departure would destabilize college athletics. Among Division I’s 345 schools at the time, all schools had an equal vote in rulemaking, which meant non-Power Five schools could control the agenda. The backdrop included growing criticism of college sports, congressional scrutiny and lawsuits. Finding an answer to keep the Power Five in the NCAA while accounting for the needs of smaller conferences would require patience, diplomacy and the wisdom of Solomon.

“He was chair of the NCAA probably in as volatile a time as we have experienced,” said Ron Wellman (P ‘98, ‘01), retired Wake Forest athletics director. “The issue was in the queue before he became chair. He knew what he was getting into, and he knew he could provide the leadership that was critical at that particular time.”

The multiyear process produced numerous hearings to gather opinions and perspectives. At one meeting, 25 groups presented their views to the board of directors. At another meeting, an audience of 800 offered individual opinions. At the spring 2015 meeting led by Hatch, 300 athletic directors filled the room to discuss the resolutions.

“He maneuvered his way through very impressively,” recalled Wellman. “He was inclusive, deferred to others at the right time, and stepped in and made strong statements at the right time.”

In the end, the Power Five conferences stayed in the NCAA; a new governance model for Division I allowed them a sub-structure for making rules in specific areas autonomously. For example, the group’s final report said the Power Five could determine

“HE DOESN’T LET HIS EGO GET IN THE WAY OF THE ENDPOINT. IT’S NOT ABOUT NATHAN; IT’S ABOUT WHAT’S RIGHT."

—John Swofford

He saved Division I athletics from likely ‘implosion.’
rules to allow their student-athletes to receive stipends beyond their scholarships for such things as transportation and academic-related supplies. The Power Five could decide to improve health insurance benefits, increase student-athletes’ time off and offer more opportunities for student-athletes to make decisions “in a fair and fully informed manner” about going pro. The new governance system for the Power Five gave student-athletes a bigger voice, with three student-athletes from each conference serving as representatives to vote on rulemaking. The autonomy did not extend to all areas of Division I rulemaking and governance, however, such as minimum academic standards, recruitment and the administration of championships.

“He took us through our most dramatic, historical market correction,” White said.

“If there was success,” Hatch said, “it had to do with the committee getting to know one another and trust one another. If there was one lesson I learned, it is that often in conflictive situations, you win by losing or by being open to change.”

Throughout the process, Hatch worked to keep the student-athlete at the forefront of the conversation. It’s a perspective Hatch “never loses,” said John Swofford, recently retired commissioner of the ACC. “In today’s world of big dollars and commercialism, that can very easily happen. He won’t allow that to happen; that’s one of the reasons people have so much confidence in him.”

Perhaps predictably, not everyone was happy with the outcomes, but Hatch was praised for his leadership in the midst of a complicated situation.

“He is highly respected from a national standpoint,” said Swofford. “He doesn’t let his ego get in the way of the endpoint. It’s not about Nathan; it’s about what’s right.”

“It was a case study to watch Nathan via his unique, well-seasoned, almost pastoral leadership, reinvent the entire NCAA,” said Duke’s White. “It’s amazing what he accomplished.”

“You almost can’t overstate his role,” said Mark Emmert (P ’01), president of the NCAA. “Nathan was, in many ways, the perfect person for the task, and maybe, the indispensable person on the board right then. It was an incredibly important moment that required an extremely talented, deft hand in dealing with challenges that literally probably saved Division I from implosion.”
Hatch has overseen the graduation of a third of the graduates in Wake Forest history.

Hatch’s investment in people went beyond the personal connections and focused on their potential. As a student who relied on scholarship aid to attend college, Hatch knows the profound gift of someone believing in you before you’ve even started proving yourself. He paired his vision with the resources of fellow scholarship student Porter B. Byrum (JD ’42); the two made a massive investment in student aid, opening Wake Forest to hundreds upon hundreds of students. (Byrum died in 2017, having given $120 million to Wake Forest in his lifetime. He considered attending Wake Forest as the transformational event of his life and remained Hatch’s close friend to the end.)

Furthering his goal to give new opportunities to students with financial need, in 2009 Hatch launched the Magnolia Scholars program. It offered not just financial assistance but counseling, academic support and study-abroad opportunities for first-generation college students. Today they number 120 enrolled each year.

“In Nathan’s a great believer in the importance of making education accessible to all people,” said former fellow provost and 66th U.S. Secretary of State Condoleezza Rice. “He has really solid beliefs in academic integrity and the importance of education as a way to bring people up.”

In October 2020, Hatch announced his retirement, harking back to personal and institutional ideals he invoked during his inaugural speech. “These years have been the opportunity of a lifetime, a great gift,” he said. “It’s been a joy to deepen Wake Forest’s mission, to expand its reach and enhance its reputation as a collegiate university.”

“In many ways, Nathan Hatch embodies what Wake Forest is — in the very best sense of the word,” said Don Flow (MBA ’83), former chair of the board of trustees.

Hatch wrote a few years ago of Wake Forest “when we live up to the aspirations of our own heightened vision, that is when we will truly be a place that stands out. In this distinct way, I trust Wake Forest will be a ‘resident alien’ in the realm of higher education — a community of learning and care so distinct, so extraordinary, so attractive that, in the words of our former professor Maya Angelou, ‘the world won’t be able to take its eyes off of us.’ ”

In the last 16 years, Wake Forest has solidified its identity as a leader in American higher education with its ever-heightening aspirations, and behind those accomplishments is Nathan Hatch — a man of deep character who spent a lifetime studying history and now leaves behind a legacy of making it.
Nathan O. Hatch becomes Wake Forest’s 13th president on July 1, with official inauguration Oct. 20 in Wait Chapel.

Hatch announces a strategic planning process to “build upon existing strengths and identify areas where we need to improve.”

Voices of Our Time speaker series begins.

Plans are announced to raise $10 million for a Presidential Trust for Faculty Excellence.

Entrepreneurship and social enterprise minor is added, one of 10 minors and eight majors created during the Hatch administration.

Wake Forest begins programs in Washington, D.C., through The Washington Center for Internships and Academic Seminars.

Test-optional policy for applicants takes effect as Wake Forest becomes the first top-30 national university not to require SAT or ACT exams.

Deacon Tower (later renamed McCreary Tower) opens, the first of an array of new athletics facilities, including McCreary Field House, Sutton Sports Performance Center and Shah Basketball Complex.

Hatch unveils a strategic plan to build on Wake Forest’s strengths as a “collegiate university” to become “an extraordinary place in American higher education.”

The Character Project is created to research character and how to include it in curricula.

South Residence Hall, the first LEED-certified building with environmental benefits on the Reynolda Campus, opens.

The Humanities Institute launches.

Porter B. Byrum Welcome Center opens.

A requirement that undergraduates live on campus their first three years takes effect.

Wake Forest Biotech Place opens downtown.

The graduate business education program, in Charlotte since 1995, opens Wake Forest University Charlotte Center at 200 N. College St.

The Interdisciplinary Performance and the Liberal Arts Center (IPLACe) is created. It’s now the Interdisciplinary Arts Center.
Faces of Courage celebrates 50 years of integration with a yearlong series of events to commemorate and honor those who contributed to a diverse Wake Forest.

Hatch becomes chair of the NCAA Division I Board of Directors during a tumultuous time.

2013

“Wake Will: The Campaign for Wake Forest” kicks off with a $600 million goal for scholarships, faculty support and new and improved facilities.

Farrell Hall opens to house the School of Business.

Dogwood and Magnolia residence halls open.

The first Presidential Endowed Chair, recognizing faculty who represent the teacher-scholar ideal, goes to historian Michele Gillespie, now dean of the College. (Nine more presidential chairs were added in the Hatch years.)

2014

Thrive, a comprehensive wellbeing initiative, launches to inspire students’ emotional, spiritual, physical and social wellbeing.

Hatch is inducted into the prestigious American Academy of Arts & Sciences.

2015

A Summer Immersion Program opens for high school students.

2016

The School of Medicine moves its medical education programs into Innovation Quarter in downtown Winston-Salem.

Buoyed by momentum, Wake Will becomes Wake Will Lead, extending the capital campaign goal to $1 billion by 2020.

2017

Wake Forest joins the Universities Studying Slavery consortium.

Wake Downtown in Innovation Quarter offers new undergraduate programs in biomedical sciences and engineering.

The Program for Leadership and Character begins.

The Wake Washington Center at One Dupont Circle, home to a “study abroad” program in the nation’s capital, celebrates its grand opening.

Hatch begins Call to Conversation dinners, which launch nationally a year later.

A study-abroad program for first-year students opens in Copenhagen.

Wake Forest receives $70 million for scholarships from the late Porter Byrum (JD ’42), the largest gift in the University’s history.

The new residence hall honoring Maya Angelou (L.H.D. ’77) is dedicated.

2018

Reynolda Cabinet expands to include the chief diversity officer.

The three-year project to transform the 1950s Reynolds Gym into a health and wellbeing center is complete.

2019

Hatch forms the President’s Commission on Race, Equity and Community to illuminate University history.

A study shows the University ranks fourth among U.S. doctoral colleges and universities in percentage of students studying abroad.

2020

Wake Will Lead campaign exceeds its $1 billion goal, having created more than 50 endowed professorships, funded renovations and new buildings, provided scholarship dollars to 1 in 5 undergraduates, lowered student debt by 30% and added nearly $400 million to the endowment.

Hatch, on behalf of the University, apologizes “for participating in and benefiting from the institution of slavery ... and for the exploitation and use of enslaved people.” The University’s Slavery, Race and Memory Project publishes essays about Wake Forest ties to slavery.

Hatch, trustees and the campus community mobilize to deal with extraordinary challenges of the COVID-19 pandemic to ensure a safe return for the 2020-21 academic year.

Atrium Health and Wake Forest Baptist Health, including the School of Medicine, merge as Atrium Health and announce plans to add a medical school campus in Charlotte.

Trustees approve a new School of Professional Studies in Charlotte.

2021

An anonymous $1 million gift creates the Dr. Dolly A. McPherson Fund for African American Studies to help establish the new major and minor.

Hatch receives the Order of the Long Leaf Pine, North Carolina’s highest civilian service award.
Wake Forest Magazine asked friends and colleagues of the president to talk about behind-the-scenes observations of his leadership in action and his impact on their lives.

*Interviews, conducted by Maria Henson ('82), Kerry M. King ('85) and Carol L. Hanner, were edited and condensed for clarity.
WHEN DR. HATCH ARRIVED AT WAKE
Forest in 2005 with his wife, Julie, it was
my first year as a trustee, and it was his
first time as a university president. At
Wake Forest, we are all deeply connected
by our mission to inspire our students
to be what they could become and to
lead lives that matter. In Nathan’s own
way, that’s precisely what happened on
his journey. His evolution was due in
large part to his intentional never
wanting to be the smartest person in the
room. Instead, he built a strong circle of
diverse thinkers and purposeful stewards
whose passion, perspectives and ideas
[together led to the smartest room.
Learning from the depth and breadth
of others’ experiences and their ability
to discern, strategize and execute is how
Nathan cultivated his own knowledge
and advanced his personal style of lead-
ership. During Nathan’s tenure,
each of our trustee board chairs
brought immense professional
expertise in higher education,
health care, business, law and
governance. Nathan worked
intently with each of them,
our board, his cabinet and the
broader Wake Forest com-
unity to foster his personal,
professional and intellectual
discovery. We have all been witness to
how these experiences, combined with
his incredible deepness of humanity,
helped him evolve into an enormously
transformational leader.
When history writes its book on
Nathan, it’s a Wake Forest story in many
ways, which is, “You will arrive here full
of excitement, enthusiasm and convic-
tion, and you will grow and develop by
learning from others and embracing
what this place is.” Now you think back
to early last year, and while his retirement
wasn’t publicly announced, Dr. Hatch
would begin his final and perhaps most
important chapter of his revered tenure.
But for him, there was still a signifi-
cant priority to accomplish at a time of
intense importance to our University and
to our society — Wake Forest’s apology
for participating in and benefiting from
the institution of slavery.

There were people who said, “I don’t
understand the apology. It’s nothing
that Dr. Hatch did. It’s nothing that we
did in our lifetimes.” But if you think
about Nathan’s ethos, regardless of all the
meaningful things that we have done at
Wake Forest, he cultivated a culture that
always reminded us to remain constant
and true to ourselves. We say the words,
Pro Humanitate. It’s not a statement of
convenience. It is how we must lead our
lives — so that they truly matter.

This is the story of Dr. Nathan O.
Hatch. A servant leader who arrived
in Winston Salem full of profound
goodness, genuinely wanting to make a
difference in this world, possessing the
self-awareness and fortitude to surround
himself with powerful catalysts, never
wavering in doing what was right. Gener-
ations of Wake Foresters will bask in the
glorious shade of the tree that Nathan
and Julie have devotedly planted.

Mit Shah (’91) is the CEO of Noble Investment
Group and a member of the Wake Forest Board
of Trustees.
I’m sure others will talk about the Slavery, Race and Memory Project, so I will talk about Wake Downtown. He was aware that the medical school was moving from the hospital to these newly renovated spaces (in former R.J. Reynolds Tobacco Co. buildings) and that an opportunity presented itself for the undergraduate campus and all the campus to have some presence downtown. He demonstrated his leadership in recognizing that opportunity and acting on it very quickly and decisively while still allowing faculty, encouraging faculty to present and propose programs rather than saying, “This is what we will do in this space.” He invited collaboration. So that’s the big picture.

Leadership is not just big-picture vision, but digging in and tackling some of the challenges. We would have monthly meetings with (top administrators.) Sometimes it was high level, and sometimes it was debating the sign that was going to go on the top of the building. How does it represent everything that was happening here and is there a flashy name? Is there a logo? How do we make sure that this space is branded? In the end, it just says Wake Forest. Getting down to that level of nitty gritty. The leadership is in what’s this going to look like 10 years from now, not just today? How do we mark the moment in a way that is lasting?

(I appreciated) his generosity of allowing people to lead, providing opportunities like the opportunity that he gave me to lead in the Wake Downtown planning. He’s definitely not a micro-manager. He’s a gracious motivator. He motivates people to give their best, even if the ways that they lead and give their best are different than his. What makes (Wake Forest) a great place is that we have lots of different styles and personalities and ways of leading. He allows other people to shine. He doesn’t feel the need to take the limelight. He enables them, seeks out funding for them and connects people but doesn’t take the credit for things as much as he probably could. That’s the beauty of a quiet leader who enables and empowers others.

Rebecca Alexander (P’22) is associate dean for research and community engagement, director of Wake Downtown and a chemistry professor who holds the Robert P. and Debra Lee Faculty Fellowship and the F.M. Kirby Family Faculty Fellowship. Wake Downtown is the University’s undergraduate presence with new engineering, biochemistry and other programs approved in 2017. They occupy a building in the research and business Innovation Quarter, next to the medical school’s building for its medical education programs.
I’ve known Nathan Hatch my whole professional career, whether he knew me or not, because I was introduced to him in graduate school in an American religious history course and that classic text (by Hatch) “The Democratization of American Christianity.” It helped shape our understanding of American history and the ways that religion and democracy and politics have always been intertwined, shaping and informing the other. In every class that I’ve ever taught in American religion, there’s some sort of reference if not assignment to Dr. Hatch’s “The Democratization of American Christianity.”

When I finally had the chance to meet him face to face, I let him know that I guess we had been kind of BFFs in my imagination for about 20 years. He’s had this kind of intellectual impact. I think that pales in comparison to who he is as a human being. If he’s a great scholar, he’s a much better person.

When I think of Nathan and Julie, I think of a level of kindness. I think of a level of tenderness, that they understand people as whole, complicated human beings that live within communities of personal relations. That may be the historian in him. I can tell this story about when he was recruiting me to Wake Forest. One of the things that Cecily, my wife, and I were so impressed by and appreciative of was when we sat down for dinner with Nathan and Julie, the conversation was not about the greatness and the opportunities at Wake Forest for me as a scholar. It was not about salary or income or professional aspirations. It wasn’t about the immense possibility that the divinity school could and does afford. It was about our life together as a family. My wife and I. Our children. Our daughter’s love for science, her twin brother’s love for the theater. The little guy’s love for sports. We spent two hours at dinner talking about their passions, the ways those passions might be realized in the state of North Carolina in general and in Winston-Salem in particular.

And so, Cecily and I walked away knowing that they were invested in us as a family. … They live into, “This is who we are as a community — that we move and go together.” That’s why I wanted to be at Wake Forest.

I think there is something about Wake Forest that allowed Nathan and Julie Hatch to thrive here. And in the process, they were able to accentuate ingredients that were already in the recipe of Wake Forest as it relates to building scaffolding of innovation without losing interpersonal tenderness.

Jonathan L. Walton (D.D. ’15) is dean of the School of Divinity, Presidential Chair of Religion and Society and dean of Wait Chapel. He left Harvard University to join Wake Forest in 2019.
AT FOUNDER’S DAY, ON FEB. 6, 1992, Provost Edwin G. Wilson (‘43, P ’91, ’93) gave a speech in Wait Chapel to a capacity crowd who had come to hear his wisdom about Wake Forest. In that speech he expressed a hope that “as Wake Forest University grows in wealth, prestige and success — as it, so to speak, ‘gains the whole world’ — it will not ‘lose [its] own soul.’”

During his 16 years at Wake Forest, President Nathan Hatch has ensured that Wake Forest has kept its “soul.” At a 2019 meeting of the University Board of Trustees, President Hatch delivered an address entitled “The Soul of Wake Forest.”

“What is our soul?” he asked. “It is our animating force, what gives us life, what joins us together in a common vision, deeply felt and jointly held. It is our common possession and our common life. It is our way of being, the source of our deepest values, the fabric of our shared humanity.”

Echoing the words of Provost Wilson, Ralph Waldo Emerson and Dr. Martin Luther King Jr., he went on to suggest that “the soul of Wake Forest lies in its inherent commitment to both intellect and character, and … that investing more deeply in marrying these core elements is both our calling and our opportunity in these times. … By setting a North Star of intellect and character, we are, at the same time, faithful to our heritage and powerfully relevant in contemporary society.”

Each president of Wake Forest has been called upon to understand the soul of the University, interpret it for the times, lead in the expression of it and preserve it for future generations. In his words and deeds, President Hatch has revealed the intensity of his focus on, and the depth of his understanding of, the soul of Wake Forest — and his commitment to a vision for the University that is true to its soul. He has informed and enlarged our understanding of our unifying motto, Pro Humanitate, which signifies the soul of Wake Forest, and he has done so in difficult times.

I am grateful to President Hatch for his indispensable leadership in preserving and interpreting the soul of Wake Forest.

Reid Morgan (’75, JD ’79, P ’13, ’14, ’19) is the University’s senior vice president and general counsel. He’s worked with three Wake Forest presidents — James Ralph Scales, Thomas K. Hearn Jr. and Nathan O. Hatch — dating back to 1979.
THERE IS MUCH ABOUT PRESIDENT Hatch’s leadership that is moving and inspiring to me. We need more leaders who embody the qualities he embodies. Being president of a university is not a job. It’s your life. (I know he could not have been the extraordinary president he’s been if Mrs. Hatch wasn’t also deeply called and committed to Wake Forest. We owe her a debt of gratitude.)

As for the qualities I admire in him, not just the qualities, but the commitments … let’s start with Pro Humanitate. That’s been Wake Forest’s motto from the beginning, but he made it come alive because of his leadership and commitment to it. He knows from his own experience that it is in giving our lives that we find life. By emphasizing this for students and alumni he has given us a loving gift. He has loved us all by reminding us that it is what we give, not what we acquire, that creates lives of meaning and joy.

Here at Recovery Café we often quote the Franciscan priest Richard Rohr who said, “What does not get transformed gets transmitted.” We know what we can’t face will never get transformed, but will get transmitted to the next generation and the next. Dr. Hatch led Wake Forest in facing its reprehensible past participation in the enslavement of human beings. I am deeply moved by that commitment which makes ongoing transformation possible.

Another commitment that resonates deeply with me is his commitment to the Call to Conversation program. At the heart of Recovery Café is the truth that we all need to be deeply known and loved and that real relationships that cross racial, religious, socioeconomic and political barriers are what change us and ultimately change our world. I can’t think of anything more needed in our nation right now than relationships that change us and heal the divides.

But more important than all the things he did, the most important gift President Hatch gave us was the gift of his “being.” He lives and leads from a very deep place. His “being,” not just his doing, calls individuals and communities to their truest selves.

Killian Noe (’80, D.D. ’17) is the co-founder of Recovery Café in Seattle, a model for those suffering from homelessness, addiction and other mental health challenges, that has spread to 24 other cities in the United States and Canada. She received Wake Forest’s Distinguished Alumni Award in 2015.
I REMEMBER AS STUDENT BODY
president my junior year talking to him about student life. At the time, parties were off campus, and I told him, “We really need to figure out what we can do to get social student life back to campus.” And I remember him saying to me, “I want to work with you to get this done.” It impacted my life personally; it’s a story to say, “If you are committed to something, you just get it done.” It just meant so much because we increased funding for students to have social gatherings on campus and really brought social events back to the Quad.

My senior year, I was student trustee, and the student body president at the time was my best friend — she still is — and we thought it’d be a really cool idea to get Dr. Hatch and the then-provost to do a rap (for a charity event). I remember (us) saying, “Dr. Hatch is definitely not going to go for this, and the provost, she is not going to go for this, either.”

So we set up meetings at the exact same time. And we said to him, “Provost (Jill) Tiefenthaler has agreed to do the rap, if you agree to do it.” And we told her, “He has agreed to do the rap, if you agree to do them.” And they both did, not realizing until several weeks later they both had been conned. It’s probably a bad idea to say that out loud. (This was) something that he probably didn’t want to do but also realized it was for charity, to get people excited about it, so, sometimes you step outside of your comfort zone, especially as a leader, to do those things.

What I love about Dr. Hatch is that he sees talent. I was going to go to Deloitte after graduation, and he said, “I really want you to be in my office (as a Wake Forest Fellow).” And I was, “I don’t want to do this. I don’t think your office will have all the things that I’m trying to grow.” And he (says), “We’ll make this the experience that you want to have.” I learned that when you find a person that’s really talented, you say, “How can I make the job fit them?” I have now tried to say, “Who are the most talented people? How can I surround myself with them?”

I would not have been in higher education at all — at all — if he hadn’t gotten me into that Fellows year. In the way that Nathan approaches leadership, it made me realize higher education is such a dynamic industry.

Trustee Jermyn Davis (’10) is a strategic cloud advisor in Google’s higher education practice. He was a student trustee and was a Wake Forest Fellow in the President’s office after graduation, developing and managing special projects. Prior to working as a strategy and operations consultant in Deloitte Consulting’s higher education division, he was chief of staff for Jill Tiefenthaler, then president of Colorado College.
AS WE ALL KNOW, OUR WONDERFUL president is a low-key — you might say limelight-shunning — individual who is wonderfully steady and even-keeled. When a crisis is its worst, we can look to him for a kind of calm support, and when things are great, he keeps us grounded. However, this gently reserved man has one moment when he loves to shine. Nathan Hatch is a frustrated orchestra conductor.

I figured that out once a year, where he hosts folks from campus and his beloved First Presbyterian Church and other friends for a rousing Christmas carol-singing session in his capacious president’s house living room. Imagine as many as 50 people packed in, some on the couches and chairs, some standing, and Nathan takes the position right by the piano, which is our accompaniment. In recent years, you’ve also had a violin.

Nathan organizes the group, will occasionally conduct us, queues the piano, calls out the next carol, and — in this wonderful basso profundo that I don’t think many of us have heard him sing unless you’re standing next to him for the alma mater or the fight song — sings out these carols in most marvelous ways.

I had been here five months and was delighted to get invited to a carol party and thought we might be going door to door, but no, it was a Nathan Hatch command performance. And he loved being out front, making sure that all us

“He sees who performs in what ways the best. He puts them in a place and on a team where ... we each can sing our part and have it merge seamlessly with the whole.”
When I think of how Nathan leads, more broadly, it’s more this same, perhaps not orchestra, but choir conductor metaphor. He organizes us as a whole; he sends the invitations; he knows who’s going to be there for, literally, the caroling session, but figuratively, he draws the talent here.

He sees who performs in what ways the best. He puts them in a place and on a team where they can be their most effective, where we each can sing our part and have it merge seamlessly with the whole. It is a kind of literal genius. Most anybody can get up and give a speech, issue a directive, write a memo or have an edict come forth, but he is constantly aware of how the whole choir is working together and what parts we need — “We haven’t had a counter-tenor for years here at Wake; I know just the one to go get.”

He organizes and carries out the execution of the finest choir (of which) I’ve ever had the honor to be a part.

Rogan Kersh (‘86) has been provost and a professor of political science at Wake Forest since 2012. He previously was an associate dean and professor at New York University and a professor at Syracuse University.
Eure was impressed with Hatch’s response to recent racial issues, including offering an apology at the 2020 Founders’ Day Convocation for the University’s exploitation and use of enslaved people. “I trust Nathan Hatch to do the right thing,” Eure says. He advised Hatch and talked with students during 2019 protests over racial incidents on campus and offensive content found in a historical review of The Howler prompted by similar findings at other universities. The review found lynching references, racial slurs, students in blackface and Confederate symbols, including photos of a few current administrators posing in front of a Confederate flag at the Kappa Alpha fraternity in the 1980s when they were students.

**WE TALKED ABOUT WHAT THESE**

kids are concerned about is that it seems that we study these things, and there are no actions on these conclusions or recommendations. The students came prepared with written statements, and I was proud of them. After it was over, I told them that I wanted to speak with the students by myself. And I said, “Dr. Hatch is a historian. They study everything; they’re meticulous about getting the facts straight, and then they do their writing or talking. So, don’t take him being slow as not wanting to react. He’s going to look at it, assess it and make a decision.”

I said, “Believe me, when he comes to a conclusion about what he thinks is right or wrong and moral, that’s one of his key values — morality. If he tells you he’s going to do something, then you can take it to the bank. He’s true to his word.”

He and I have not always agreed on everything, but he was willing to tell me why he thinks this is better than that, and I have to respect that. His leadership came in the fact that some of the demands were met. One of them was they had no place that they call theirs. Within two weeks, (the Black Student Alliance) had a lounge because he said that night that we will look into this, and if we can do it, we will do it.

The thing that impressed me with those students was that he listened to them. But more importantly, he heard them and felt their pain and their anguish that “How long are we going to have to take this kind of thing?” It takes the rare person to hear what someone is really saying, which means they’re internalizing it and then acting on it from a moral perspective.

(On the slavery apology) he is the only president deciding this is a part of Wake Forest history. No one forced him into doing it. He did it on his own. That, to me, is leadership. (He) was willing to say, “We need to acknowledge this, and we need to figure out how we’re going to change this situation” — with the commitment to the Slavery, Race and Memory Project.

**Herman Eure** Ph.D. ’74, P ’23

Herman Eure (Ph.D. ’74, P ’23) is a trustee and a retired biology professor, department chair and associate dean. He was the University’s first Black full-time graduate student, first Black doctoral recipient on the Reynolda Campus and first Black full-time faculty member. He initiated the Office of Minority Affairs (now the Intercultural Center) in 1978. He received the Medallion of Merit in 2017.
NATHAN CARES DEEPLY ABOUT character. For Nathan, everything starts with what it means to be good and do good in the world. So when it comes to higher education, he firmly believes that you can’t just teach young people a set of skills that will give them a career and money, and be happy with that. Instead, we must help all our young people learn how to be critical thinkers who are ethical, principled and compassionate. To that end, because our world has grown so complex and the problems we face so immense, we have never needed the humanities more given their formative role in shaping character. (Nathan has) signaled to everyone that we are a liberal arts university first and foremost, that the humanities are at the core of our distinctive Wake Forest education.

Nathan has been extraordinarily innovative. He understood the significance of creating the Office of Personal and Career Development long before other institutions had even begun to rethink career development. He understands the significance of putting a School of Professional Studies in Charlotte because of the big market there. He understands how the Atrium Health and Wake Forest Baptist Health partnership ensures that the medical center remains strong for generations to come. Those are cutting edge, imaginative, 21st-century pursuits.

But his penchant for innovation is always steeped in those values that speak to what it means to be human and that are embedded in a liberal arts education. All his decisions are rooted in this very important place. Perhaps nowhere has this been more evident than in his demonstration of character — and courage — in leading the institution to bring students back to campus last fall at a time when many schools went wholly online.

He said, “We have to figure out … how to keep everyone healthy and safe, but we are in the business of educating our students and educating the whole student” and that meant having students return to campus, and he was right.

Michele Gillespie is Dean of the College and the Presidential Endowed Professor of Southern History. Since joining the faculty in 1999, she has also served as associate provost for academic initiatives from 2007 to 2010.
I spent the year after graduating as a Fellow in the Office of the President. During that time, Dr. Hatch was generous enough to meet every two weeks to discuss career aspirations and planning. But deeper than offering career advice, he took the time to get to know me by asking deep questions about talent and service and vocation.

At one point he suggested we read Jim Collins’ “Good to Great” to see what we could both learn. It opened my mind to an interesting pattern amongst effective leaders: that oftentimes the best leaders are deeply humble personally but bold and energetic on behalf of his or her institution. 

I realized midway through the book that I was sitting across from someone (Dr. Hatch) who perfectly embodies Collins’ description. And shortly after completing the book, when it came time to write my Rhodes Scholarship essay, I talked about having had great role models in my life. As you might imagine, I had Dr. Hatch in mind.

Dr. Hatch brings out people’s best through his authenticity, creativity and steadiness. Our shared friendship with Michael Lamb (executive director of the Program for Leadership and Character) is a testament to this. Michael likely would have landed somewhere else were it not for Dr. Hatch’s vision and commitment.

Both Michael and Dr. Hatch view leadership and character through a relational lens. It’s about the team you build. It’s about the missions you rally people around. It’s about building consensus, collaborating, tapping the brightest minds. And yet — at risk of sounding overly poetic — Dr. Hatch has shown that sometimes it’s more about the heart than the mind. You need both, but you have to bring your full heart to everything you do. That, above all else, is the best lesson Dr. Hatch taught me.

Jim O’Connell ('13) is a member of the board of trustees and president of Vinik Family Office in Tampa, Florida. As an undergraduate, he was a student trustee and co-chair of the Honor and Ethics Council. After graduating, he was a Wake Forest Fellow in the President’s office. As a Rhodes Scholar at the University of Oxford, he met Michael Lamb and introduced him to Hatch. Lamb was hired in 2016 and began the Program for Leadership and Character. O’Connell splits time between Tampa and New York City.
I thought about what I learned from working with Nathan. One is holding always to the highest personal and professional standards. It’s not always easy, but one thing I’ve learned is don’t take shortcuts. Put in the effort. If a goal is worthy of your attention and worthy of accomplishing, it’s worthy of your effort.

With Nathan Hatch — I think anyone who gets to know him well discovers this quickly — the same person shows up every time. There are not several Nathan Hatches. He is the same person regardless of the audience, regardless of the event. To have the same person show up every day in the office is a huge gift, and I know that’s not always the case in all work environments.

He talks about it a lot: At the end of the day, put your trust in people rather than plans or strategies. You can have the most beautifully thought-out plans and strategies, but if you don’t have the right people, you risk failure big time. Look for the best people. Trust them to do the work that you hired them to do. Don’t sweat the small stuff. … If you put your effort into finding the best people, let them do their job, and rarely will they disappoint you. At the end of the day, what do you trust — the plan or the people? Trust the people.

Finally, you don’t have to be the loudest voice in the room to be effective. As people have come to know Nathan over time, I think people came to appreciate and rely on that and understand that — strength comes from being who you are, that you are not trying to pretend that you’re someone else.

Mary Pugel has served as Nathan Hatch’s chief of staff at Wake Forest since his arrival in 2005. She had a similar role, starting in 1997, when Hatch was provost at the University of Notre Dame. She has known Julie Hatch all her life. Pugel’s family and Julie Hatch’s family share a friendship that goes back generations and to Priest Lake in Idaho, where the families have had cabins in the woods across the creek from each other.
Leadership Behind the Scenes

We asked three University trustees who served as board chairs during the recent capital campaign about their insights. The question: “During your time serving as board chair, you saw Nathan Hatch behind the scenes having to make important, sometimes difficult decisions. Tell us about a time that revealed his character and your regard for him.”

NATHAN HATCH IS ONE OF THE finest leaders I have ever met. It is truly one of life’s blessings to have been able to work with him and to continue to work with him. I am so glad that he and Julie are not going anywhere and that they will continue to be part of the fabric of Wake Forest.

There are lots of stories to tell which reflect Dr. Hatch’s character — stories of many types. He loves Wake Forest and puts it first in all that he does. But sometimes, loving Wake Forest means defending her. Dr. Hatch certainly is slow to anger. He has had many reasons which would provoke anger from the average man but not Dr. Hatch. There was one time, however, where it was not so much what he said as how he looked.

When he learned that individuals involved with other institutions had been stealing football plays from Wake Forest in what is now known as Wakey-Leaks, he was ready to put on his armor and get on his horse as the veins popped out of his neck.

He also has a deep conviction to do what is right. He called me last year and said, “Gerald, we just cannot wait any longer. Now is the time for Wake Forest to apologize for its role in slavery. It is the right thing to do, and I want to do it now at the Founders’ Day Convocation.”

We had a board meeting scheduled soon, but he wanted my support that he could proceed with the apology and do it now. He had deliberated; he had listened; and he was convinced that now was the time, and he was ready to proceed. Of course, the board, being led by his example, followed at its next meeting to make it our own apology.

Another story reminds me how the Greatest Generation made decisions in times of crisis. During the early months of COVID-19, Dr. Hatch made many decisions affecting the lives of others while information was incomplete, yet decisions had to be made. All the while, he inspired the internal COVID working team and the special COVID committee of the board with historical examples, words of perspective and encouragement that acknowledged not only the COVID times, but the times of racial injustice, the need for discourse and not discord.

He wrote on March 17, 2020, “We need to be sure that the stress of this crisis bends us toward each other.... We must find ways to take seriously those least supported in weathering the storm.” He wrote with conviction that this is the time for Wake Forest to shine as an example of character and leadership in our society today.

“We need to be sure that the stress of this crisis bends us toward each other.”

–Nathan Hatch

Gerald Roach (’80, JD ’82, P ’09, ’12) of Raleigh is serving as chair from 2018 to June 30. He led the presidential search committee, which selected Susan Wente to succeed Nathan Hatch. He is firm chair of Smith Anderson, the largest law firm based in Research Triangle Park, where he specializes in mergers and acquisitions, capital markets and corporate governance.
OVER 16 YEARS I HAVE FOUND A consistent set of character attributes that infused all of Nathan’s work and his life: First, Nathan is utterly trustworthy and a person of great integrity. He keeps his promises and never seeks his advantage over another person or the community. He deeply believes that leadership does not confer privilege, but instead, requires fully embracing responsibility. Those who encounter Nathan also know that he is committed to their flourishing.

Secondly, Nathan is intellectually curious and interested in a wide range of ideas and subjects. He loves to learn from other people — from sports to politics, from religion to history, from economics to foreign policy, from art to medicine.

Thirdly, Nathan is very self-aware. He knows where his strengths lie, and he is comfortable seeking the assistance of people who have expertise outside his domain. This combination of confidence and humility and the openness to others’ strengths allows him to build a deep esprit de corps among his team.

Fourthly, Nathan is an “ideas-in-action” person. He likes to get things done! He is patient with people but impatient with bureaucracy that gets bogged down in endless reviews. His questions: What is the problem or opportunity? Who are the best people to review this and give input? What do they recommend that we do? Who is going to lead this effort?

Lastly, Nathan’s character is marked by gratitude for the extraordinary life, family, friends and institutions that have shaped him. When we think of his leadership at Wake Forest, the one phrase that is repeated is: “Well done!”

NATHAN HATCH IS AN ENIGMA: Great expectations tethered to bedrock values, a gentle, almost shy person in a job that, on a daily basis, keeps him in the spotlight and in the eye of the hurricane. Operating a residential community of several thousand diverse 18-to-21-year-olds, employing necessary support staff and a couple of hundred ambitious, dedicated, extremely well-educated faculty members, while fielding competitive athletic teams at the pinnacle of the NCAA is not for the fainthearted. The precarious unpredictability of this business — financially, socioculturally, politically — would give any investor pause.

Nathan has challenged Wake Forest to provide the highest quality educational, social and recreational experiences to prepare and nudge our students into readiness for living fulfilling lives of character and purpose. His magic is in identifying people of character and talent, fostering collegial reliance on one another and then giving them the headroom to act.

“He loves to learn from other people — from sports to politics, from religion to history, from economics to foreign policy, from art to medicine.”

Don Flow (MBA ’83) chaired the board 2012-2015 and the University’s $1 billion capital campaign. He is chairman and chief executive officer of Flow Automotive Companies in Winston-Salem.

Donna Boswell (’72, MA ’74), first female chair of the trustees, served as chair 2013-2015. She retired from the global law firm Hogan Lovells in Washington, D.C., where her specialty was health care law and regulation. She lives in Winston-Salem.
Gratitude for the finest team in higher education

By President Nathan C. Hatch
Illustrations by Jack Molloy
As I reflect on the past 15 years at Wake Forest and the last year of stress and urgency caused by the COVID-19 pandemic, I am deeply grateful for all I have learned about working together on really important matters — in good times and bad.

Teamwork has become a signature of Wake Forest. My first example is one close to home. Julie and I came here with a common goal that the purposes of Wake Forest would become our own. I am grateful that, with complementary skills and personalities, she joined faithfully in the effort to make Wake Forest a better, and more distinctive, learning community.

At Wake Forest, teamwork has blossomed in so many quarters. I can think of no major accomplishment that has not been launched by committed teams of Wake Forest faculty, staff, administrators and students. Together, we launched test-optional admissions, the Magnolia Scholars program and the Office of Diversity and Inclusion. Together, we worked to build Wake Downtown and a new engineering program and other efforts in biomedical science. Together, we merged two business schools and put our medical school and hospital under joint management. Together, we renewed our dated residence halls and athletic facilities. In these and many other efforts, teamwork has been a strategic accelerator.

In the last year, the sense of teamwork has manifested itself across the University in unbelievable ways, and I want to share with the entire Wake Forest community the countless ways the on-campus community has amplified the spirit of cooperation and goodwill in the crisis of the pandemic. The reality of COVID-19 in a living community of some 8,000 people such as Wake Forest is that there is not one emergency but a set of ongoing crises. It has been not one tsunami but a roiling sea that every day created waves coming from many directions. The challenges were different and constant: evolving medical advice, challenges to sustain teaching and research, changing state regulations, varying disease outbreaks, variable student response. Every day and every week had new and often unexpected challenges. Teams had to manage a rolling series of crises that involved hundreds of decisions.

Dwight Eisenhower once said that “plans are worthless, but planning is everything.” All across Wake Forest, multiple teams have learned this kind of dynamic planning — understanding that today’s decisions will probably need altering tomorrow; that one has to test how matters are playing out on the ground; that one must calibrate what others are doing and apply best lessons learned. It is this kind of team-based crisis management that has become the standard, with nimble, week-by-week adjustments being made all across the University.

All of this took new forms of organization — and there were no books on the shelf of how to do this. These new structures were deeply cross-functional and broke down many silos on campus — a great lesson to be learned moving forward.

There are many heroes in this chapter of our story — colleagues who went far beyond the call of duty, who had a commitment, deep in their bones, that we simply could not fail. I think of all the adjustments made by the teams in the Office of the Dean of the College and by our department chairs. I think of the burdens placed upon the team in the Office of Residence Life and Housing. I think of all the demands upon the Office of Procurement Services, with the great need to provide testing and procure Personal Protective Equipment material to ensure safety in offices, classrooms and residence halls.
I am deeply indebted to scores of teams across the University and to the Reynolda Cabinet — the finest team I have ever witnessed in higher education. The past months have been enormously stressful and challenging. I have been amazed by the common ability to come together, to trust each other, to work unselfishly, to pitch in wherever needed, to start in one direction and pivot on a dime when conditions changed or when a better idea was presented. I am grateful that people have expected the best of each other. They have not pointed fingers or laid blame in times of great stress.

I am grateful to teams across Wake Forest for their creativity, their gritty resolve and perseverance, their dedication to the welfare of all. Thank you for the optimism — even amidst chaos and criticism — and for the willingness to make firm decisions when only a fraction of the evidence needed was available. Thank you for the willingness to solicit input from others and to communicate broadly and endlessly with all of our stakeholders. We had to reinvent the University, and so many teams have been critical in that process.

The deepest friendships are often forged in the caldron of stress and hardship — and one can see that in sports, in military encounters and in things like political campaign boiler rooms. I have great affection for so many in the Wake Forest community because we have been in the boiler room together and spent hundreds of hours wrestling with complexity and enigmas. All of you have my unfailing respect because together we have done something extremely challenging and really important. As a group, you have manifested something precious and rare: sterling character.

When I think back on these years, I will remember the glistening buildings of Wake Downtown and Farrell Hall and the renewed Reynolds Gym. I will remember new academic programs, the Office of Personal and Career Development, efforts in diversity and a magnificent capital campaign. I will remember the Atrium deal, which takes academic medicine from something at risk to a long-term position of strength. I will remember new athletic facilities and exulting in some great athletic wins — while forgetting the losses.

But what I will remember most about these years is what teams at Wake Forest have achieved since March of 2020. Yours is a great gift to all of Wake Forest, its faculty and staff, its students and alumni, its trustees and friends. Your concerted effort in the midst of the storm is something long to be remembered and cherished.

And there is something very Wake Forest about that. If we really are about Pro Humanitate, for the flourishing of people, then holding this learning community together under stress and pointing it forward is the greatest gift we can offer. Thank you from the bottom of my heart.

“I have been amazed by the common ability to come together, to trust each other, to work unselfishly, to pitch in wherever needed, to start in one direction and pivot on a dime when conditions changed or when a better idea was presented.

I am grateful that people have expected the best of each other.”
WAKE FOREST’S NEW PRESIDENT HAS EMBRACED SERENDIPITY IN SCIENCE AND IN LIFE.

PHOTOGRAPHY BY KEN BENNETT
Susan R. Wente, a renowned biomedical scientist, will become Wake Forest’s 14th president and its first female president since the University’s founding in 1834.

She has spent the past seven years as Vanderbilt’s provost and vice chancellor for academic affairs and was interim chancellor from August 2019 to June 2020. Among her notable achievements as a higher education leader: the appointment of Vanderbilt’s first female athletics director, creation of its Office of Inclusive Excellence, her oversight of a historic transition of Vanderbilt University and Vanderbilt University Medical Center into two separate legal and financial entities in 2016, and innovations to enhance the undergraduate experience, including the elevation of arts and humanities.

Born in Norfolk, Nebraska, she spent her early childhood in Holstein, Iowa, and then in Emmetsburg, Iowa, population 3,904 in the last census. Her path to college took a dramatic, unexpected turn toward a career in academia and the research lab. She got a Bachelor of Science degree in biochemistry at the University of Iowa in 1984. With a focus on protein biochemistry, she moved to California to earn her doctorate in biochemistry at the University of California, Berkeley. Her dissertation was titled “Site-Directed Mutations Altering the Active Site and the Nucleotide-Binding Site of Aspartate Transcarbamoylase.”

At Berkeley, she met a fellow graduate student, geneticist Chris Hardy. They married and have two grown daughters, Allison and Lindsay Hardy.

Maria Henson (’82) of Wake Forest Magazine spoke with Wente (pronounced “Wen-tee”) by Zoom in the spring about her selection and her life’s path. For more about Wente, her many academic honors, her championing of equity and inclusion and the presidential search led by trustees chair Gerald Roach (’80, JD ’82, P ’09, ’12), go to search.president.wfu.edu.
MH: Tell me about your parents, Betty and Harold Wente.
SW: My mom worked the whole time I was growing up. She was a (registered) nurse, and she worked either in the hospitals or the nursing homes in the towns where we lived. ... Dad — every summer he was continuing his education. He got his master's by going back to school in the summers, and we moved to Emmetsburg because he had gotten a job at the community college. He kept advancing in both his education and also his positions. He eventually completed his doctorate in education. That was when I was in ninth grade. I remember I hung a shin‐
gle out on the garage for him because he had gotten his doctorate.

MH: How did they shape you?
SW: They had a real partnership, and that partnership was evident every single day in terms of how they were balancing their career ambitions. They were in professions that were real servant leaders — nursing and teaching, ... They very much instilled in us the power of education, how that can enable opportunity. None of my grandparents went to college. My mom's mom, the only time she worked outside the home was during World War II. She went off to work in a munitions plant, and my mom's dad was a lumberyard man. So very modest means.

We had huge gardens. It wasn't until I went to graduate school that I actually opened a can of tomatoes with a can opener. ... Every fish I ever ate came out of the freezer from my grandfather's or my parents' fishing — perch and walleye. Very agrarian. Their working really inspired in us this work ethic and appreciation of education and how it was a huge opportunity.

MH: I've read that you are exceptionally organized. What's your secret sauce?
SW: I was probably taught it by my mother. She worked every other week‐end as a nurse, and you'd get up in the morning, and here was your to‐do list. You had to check that you'd done everything before you could do what you wanted to do. ... My own approach is to compartmentalize different activities.
SHE SAID, ‘WELL, I’VE BEEN LOOKING AT YOUR RECORD. I THINK YOU SHOULD GO OPEN MAJOR. ... IF IN TWO OR THREE YEARS YOU STILL WANT TO BE A DENTAL HYGIENIST, COME BACK TO US, AND WE’LL FIGURE OUT WHAT TO DO.’
or different functions or different work that you have got to get done and be really sure that you have delegated those activities and functions in ways that are most important to you.

MH: You are known as somebody who’s a hard worker who can get things done. I’m interested in your early days working corn and soybean fields.

SW: We all had odd jobs growing up. I was babysitting at the age they let you babysit. My brothers were mowing lawns. I worked at the A&W restaurant all the way through high school and when I came back in summer, between my first and second year in college ... as well as teaching Upward Bound at the community college that summer.

MH: Were you a waitress or hostess? 

SW: I was behind the front counter taking all the orders by phone. I was a leader — a manager — so I was coordinating between the carhops and the kitchen, making the drinks, getting all the orders on the trays, in charge of reconciling all the accounts, like the money at the end of the night. I was chief mug washer. That was all-year-round.

In the summers I would take on additional jobs of detasseling corn and walking soybeans. You’d get up before daybreak, get on a school bus, and they’d drive you out to the fields. You got your sack lunch for the day. You had your long-sleeve shirt, bandana over your head, and you worked until 4 or 5 in the afternoon. ... You're dirty as can be. Bugs and pollen. They paid extra if you worked every single day through the weekend.

I remember that first summer I worked 14, 15 or 16 days doing that. And I remember at the end of it I got my single paycheck — it was like $800 or something like this — and I signed the whole check over to my parents because I wanted contact lenses. ... (Individual farmers) would hire us, at an hourly rate (for walking soybeans). That was better work than detasseling. It was cleaner work. The beans were lower — they were more like knee high — and you’d hoe through. You weeded the soybean field. I got great suntans.

MH: Moving to your college-to-career path, I was struck by how you wanted to be a dental hygienist. What changed?

SW: Coming from a small town — this is pre-internet days — what you learned about in terms of careers was from those you knew immediately around you. ... I loved science. I loved math. (I thought), 'What's a career path that I could aspire to?' And I would say there was a confidence gap in terms of actually saying and declaring, 'I'll be pre-med or pre-chemistry.' ... I think going (to college) and saying, 'I’m going to be a pre-dental hygiene major' felt safe, felt comfortable, and I could have a job in four years.

MH: So that one woman really changed your life and your life trajectory.

SW: This is what I think about in terms of our current undergraduates and my passion for mentoring and my passion for advising, my passion for us ensuring we’re thinking about each person as an individual, that we’re giving opportunity, that we are looking at college as a time when young people are in different phases of their development and how we provide an environment that’s safe and welcoming for them to really discover their full potential.
I think the draw to Wake Forest that came through in every meeting I had with the search committee ... was really this view of community that was promoted. The search committee was incredibly inclusive, incredibly thoughtful.

That is something I’ve worked to continue paying forward. ... It was not just getting an education that was transformational for what I’ve been able to do, but it was the people, the personal attention and that pre-dental hygiene adviser and the open-major adviser who really listened to me.

MH: You got that personal attention and direction at a time you needed it. What do you say to undergraduates now?

SW: You want to use this opportunity to aim high. Try doing some things that you never thought you’d be interested in. It’s a way of saying take some academic risks. You also want to use your resources. Build your network. Go to those office hours for faculty. Talk to your advisers. Aim high and explore.

MH: A lab job in college really fired you up, right?

SW: I loved it.

MH: Why?

SW: One, you’re the first person doing a particular experiment. You have that opportunity to find out something nobody else knows. You’re really navigating that unknown and you get to change the variables. It was a bit like cooking. It was very independent. You were doing experiments. You were designing the experiments. You were analyzing results. You were empowered in that way.

(Wente, now an acclaimed scientist who has studied the pathways between the nucleus and cytoplasm of cells and is the author or co-author of more than 100 peer-reviewed research articles, went on to discuss her excitement around teams she had worked with in labs and as a professor. The forming of such research teams, she said, “highlights the serendipity of science and how unexpected results and unexpected connections are really the foundation and further how collaboration and networks work.” Teamwork along with transparency and trust, she has said, will be her guiding principles at Wake Forest.)

MH: What’s the No. 1 trait you look for when bringing people onto your teams?

SW: Fundamental values and their ability to communicate. Fundamental values being: Are they honest? Are they committed? And there’s resiliency. Being optimistic and resilient.

MH: What is your communication style?

SW: I try to be very direct and also empathetic and find ways to think about when I’m delivering messages what the person hearing it will be viewing. ... When you’re communicating with someone, the first thing somebody hears is how is this going to impact me, then how is it going to impact we before it’s going to impact others. I try to be authentic. I don’t have any qualms about sharing who I am or where I’ve come from.

MH: What one word describes you best?

SW: Oh, boy.

MH: That’s two words.
SW: I’m strong but not strong meaning pushy. I mean like, I can handle it. I’m a problem solver. People have always told me that. My husband sometimes says, ‘As soon as you see a problem, you want to fix it. Can you just leave it laying for a day or two?’

MH: With this career you have had, obviously you could go many places, but you chose to come to Wake Forest. Why, and how are you feeling now that you’ve had a few weeks since the announcement?

SW: I think the draw to Wake Forest that came through in every meeting I had with the search committee, in conversations I had with the board chair, Gerald Roach, who was incredibly effective at recruiting me into the search, was really this view of community that was promoted. The search committee was incredibly inclusive, incredibly thoughtful. … I began to think about it: What am I bringing to Wake Forest — my skills and background compared to where strategically the University is positioned and moving? I have a deep background in academic medicine. Then everything I’d heard and known about the focus on the teacher-scholar model and the devotion to academic excellence and the undergraduate experience and balancing that with strong professional schools. … And then I’ve also had experience with (Division 1) athletics and the Power Five conference. I know that Wake Forest is very committed in having a true student-athlete experience as one of its offerings for students, among others.

So, it was the right time at the right place. It became truly the right place, and I’m excited about it.

— The interview was edited for brevity and clarity.
THE CLASS OF 2021 finished a difficult year with a joyful Commencement in person, albeit in separate groups for conferral of degrees across three days, highlighted with an outdoor celebration and fireworks finale for undergraduates at Truist Field.

With COVID-19 restrictions easing and a recurring theme of dealing with the uncertainty in all journeys, nearly 1,200 undergraduates and 800 students in the professional and graduate schools walked across a stage at Lawrence Joel Veterans Memorial Coliseum to accept degrees. The arena was set up to mimic the traditional Commencement look of Hearn Plaza. A limited number of socially distanced friends and family watched from the stands, and others viewed the ceremonies via livestream online. (Video at commencement.wfu.edu)

The School of Medicine held its hooding ceremony at the Coliseum on May 15. On May 16, a series of undergraduate confer- rals, with remarks by student leaders and scholars, and the School of Divinity hooding ceremony at Joel preceded the Truist Field ceremony. The evening celebration included dance and music performances, videos and pre-recorded speeches by former U.S. Secretary of State Condoleezza Rice, U.S. Secretary of Transportation Pete Buttigieg and NFL wide receiver Kendall Hinton (’19). The business, law and graduate school hooding ceremonies were held May 17.

Rice, director of Stanford University’s Hoover Institution, wished for graduates that they find their passion and encouraged them to continue to tackle hard tasks, which the pandemic has prepared them to do. She emphasized valuing relationships throughout life, especially those made in college. And she urged students: “Pledge today to do something about making life better for those who have less than you do. When you ask, ‘Why do I have so much?’ … you get there by looking at those and working with those who have less. It’ll never allow you to be entitled or aggrieved again. … And so as you leave this place, … exercise those obligations to society to make this a better, more prosperous and peaceful world for all.”

Buttigieg, former mayor of South Bend, Indiana, former presidential candidate and first openly gay U.S. cabinet member, told students, “Many of the changes you have experienced have been terribly constraining, and yet, in so many ways, you have decided not to be reduced by them.”

He cited graduates’ accomplishments and the critical issues they face, from pandemic to climate crisis. “Rarely does history assign
so many forms of urgent work to a single generation, and yet here you are. ... I can’t wait to see the wonderful things that you will do for humanity.”

Hinton, who played football at Wake Forest, told his story of overcoming severe disappointments. His dream of playing quarterback was dashed in 2017 at Wake Forest when a tackle tore his knee ligament, then he was suspended in 2018 for a self-inflicted mistake. He faced another loss when he was let go as a free agent trying out for the Denver Broncos, only to be recalled and asked with less than a day’s notice to start a game at quarterback because COVID contacts had sidelined all the team’s quarterbacks. “Mind you, the last time I had thrown a ball was in 2017.”

He realized “at every single stage in my life, there has been a moment where I’ve had the choice to embrace uncertainty or stay in my parameters. Always choose uncertainty. The game ends, and my performance is poor. But the experience, the support, the opportunities that have opened up from embracing the uncertainty are like no other.”

He told 2021 graduates, “who have endured ambiguity and adversity on an unprecedented scale,” to learn the lessons in everything. “Embrace every twist and turn on your journey.”

The Truist Field events included the awarding of an honorary doctor of humane letters to retiring President Nathan O. Hatch, which brought cheers from graduates and a happy chant of “Natty O!” Eighteen U.S. Army ROTC cadets, including graduating student body president and battalion commander Miles Middleton (photo bottom right), took their oaths to become officers.

The Baccalaureate service, normally held the day before Commencement in Wait Chapel, aired online in pre-recorded segments on May 15. The Most Rev. Michael Bruce Curry, 27th presiding bishop and primate of The Episcopal Church, told the Class of 2021: “Yours has been a different educational, academic and, dare I say, existential journey. I pray that the hardships, the good memories, the tough memories will help to forge not only you but all of us into a more humane people, a more compassionate people, a people committed to following and living the way of love.”

Graduates and parents expressed delight and gratitude on social media: “Four years in the blink of an eye.” Another said, “Graduating during a pandemic makes 2021 Grads very special and belong to this unique tribe. Go conquer!” And perhaps the best summation: “Look out world ... these Deacs are coming!”
Retiring Faculty

FROM THE REYNOLDA CAMPUS

Bernadine Barnes, Ph.D., Professor of Art, 32 years
Holly H. Brower (’83), Ph.D., Associate Professor of Business, 16 years
Jule M. Connolly, M.Ed., Professor of the Practice of Mathematics and Director of the Math Center, 36 years
Luellen Curry, J.D., Associate Professor of Legal Writing, 31 years
Michael K. Curtis (P ’03), J.D., Judge Donald Smith Professor of Constitutional and Public Law, 30 years
Thomas Frank, Ph.D., University Professor and Associate Dean of Continuing Studies, Graduate School, 11 years
Mary L. Friedman, Ph.D., Professor of Spanish and Italian, 34 years
Carole L. Gibson, Ph.D., Professor of Biology, 41 years
Louis R. Goldstein (P ’93, ’06), M.F.A., D.M.A., Professor of Music, 42 years
David Hagy, M.F.A., D.M.A., Teaching Professor of Music and Director of the University Orchestra, 26 years
Robert Hebert, M.S., Business Librarian of Z. Smith Reynolds Library, 28 years
David J. John, Ph.D., Professor of Computer Science, 39 years
Ralph C. Kennedy, Ph.D., Professor of Philosophy, 45 years
Kathleen Kron (P ’08, ’13), Ph.D., Professor of Biology, 29 years
Page H. Laughlin, M.F.A., Harold W. Tribble Professor of Art, 34 years
David B. Levy, Ph.D., Professor of Music, 45 years
Darlene R. May (P ’05, ’10), Ph.D., Teaching Professor of Arabic, 14 years
James A. Narus (P ’09), Ph.D., Professor of Business, 33 years
Debbie W. Newsome (MAEd ’96, P ’08), Ph.D., Associate Professor of Counseling, 22 years
Patricia A. Nixon, Ph.D., Professor of Health and Exercise Science, 22 years
James L. Norris (P ’05), Ph.D., Professor of Mathematics and Statistics, 32 years
Teresa Radomski, M.M., Professor of Music, 44 years
Luis Roniger, Ph.D., Reynolds Professor of Latin American Studies and Politics and International Affairs, 17 years
James H. Ross, M.S., Associate Professor of the Practice of Health and Exercise Science, 20 years
Robin W. Simon, Ph.D., Professor of Sociology, 12 years
Clark Thompson, Ph.D., Associate Teaching Professor of Philosophy, 20 years
Ronald L. Thompson, Ph.D., John B. McKinnon Professor of Business, 21 years
Ulrike Wiethaus, Ph.D., Professor of Religious Studies and American Ethnic Studies, 30 years

FROM THE MEDICAL CAMPUS

Khalil N. Bitar, Ph.D., Professor of Regenerative Medicine, nine years
John M. Burkart (P ’16), M.D., Professor of Internal Medicine, Nephrology, 36 years
Arthur S. Foreman (MD ’81), M.D., Associate Professor of Anesthesiology, 35 years
David P. Friedman, Ph.D., Professor of Physiology and Pharmacology, 30 years
Daniel P. Krowchuk (MD ’77, P ’14), M.D., Professor of Pediatrics, 31 years
John S. May (MD ’82, P ’10), M.D., Professor of Otolaryngology/Head and Neck Surgery, 32 years
James E. Peacock, M.D., Professor of Internal Medicine, Infectious Diseases, 37 years
Edward G. Shaw (MA ’10), M.D., M.A., Professor of Internal Medicine, Gerontology and Geriatrics, 30 years
Thomas L. Smith, Ph.D., Professor of Orthopaedic Surgery, 30 years
Francis O. Walker, M.D., Professor of Neurology, 37 years
Steven H. Wong, Ph.D., Professor of Pathology, nine years

With a $5 million, three-year grant from Gilead Sciences, the School of Divinity is establishing the COMPASS Initiative® Faith Coordinating Center to fight HIV/AIDS among vulnerable, under-resourced populations in the South. They include those in rural Appalachia, African Americans and LGBTQ individuals. The COMPASS center will offer collaborative learning and training to help nonprofits, clergy and faith leaders respond to those affected by HIV/AIDS. Plans include supporting faith-health fellows in the Master of Divinity Faith Health concentration and sharing grants. The center’s executive director is Allison Mathews, founder of Community Expert Solutions consulting company, an adjunct assistant professor of sociology at Wake Forest and former associate director of integrating special populations in the Maya Angelou Center for Health Equity at the School of Medicine. The pre-recorded Founders’ Day Convocation in February included remarks by the co-chairs of the President’s Commission on Race, Equity and Community. They are José Villalba, vice president for diversity and inclusion and chief diversity officer, and Erica Still, associate dean for faculty recruitment, diversity and inclusion and associate professor of English. President Nathan O. Hatch spoke of continuing University work on the commission’s recommendations. Juliane Zhu (’21) of Shanghai delivered her winning senior oration about her first Thanksgiving at Wake Forest with a host family. Sophomore Mahlea C. Hunt sang “Amazing Grace” in the Siouan Indigenous Language. Savannah Baber (’19) read the University’s Indigenous Land Acknowledgment. More at bit.ly/3u1S986

Emily Neese (’81, P ’13, ’16) was named vice president for finance, strategy and planning in April. She co-chairs the University’s COVID-19 response team and has led planning and implementation of Wake Downtown in Innovation Quarter and other projects. More at bit.ly/3eCQsHw

The School of Medicine announced the midtown Charlotte location for its second medical school campus as part of Wake Forest Baptist Health’s merger with Atrium Health. The 20-acre site at South McDowell and Baxter streets is less than a mile from Atrium Health Carolinas Medical Center, which is undergoing renovations that will benefit medical students’ training. Atrium also announced the Bishop George E. Battle Jr. Scholarship Fund, initially at $5 million with a goal of $10 million, to support continuing education for those in underserved communities. More at bit.ly/3vnfdOB
Wake ‘N Shake’ traditional 12-hour fundraising dance marathon gave way in the pandemic to a socially distanced luminary walk on Hearn Plaza and a hybrid of virtual and in-person events in March, raising $186,791 for the Brian Piccolo Cancer Research Fund. More at bit.ly/3iZYFfI

School of Divinity Associate Professor of Religion and Culture Derek Hicks is director of the new Center for Research, Engagement and Collaboration in African American Life to support students and scholars, offer lectures and conferences and collaborate with the Winston-Salem community. Former U.S. Secretaries of State Madeleine K. Albright and Colin L. Powell discussed leadership and character in public life in the keynote of a virtual “Character and the Professions” international conference in March. The conference by the Wake Forest Program for Leadership and Character and the Oxford (UK) Character Project previewed their Nov. 9 in-person appearance at the Face to Face Speaker Forum. In April, the forum featured a virtual conversation with Isabel Wilkerson, author of the bestseller “Caste: The Origins of our Discontents” (Random House, 2020) and the first Black woman to win a Pulitzer Prize in journalism, awarded in 1994. In May, a virtual performance and conversation with cellist and cultural ambassador Yo-Yo Ma previewed an in-person Face to Face forum planned for Feb. 16. More at facetoface.wfu.edu

Kline Harrison, who joined the business faculty in 1990 and has grown the Center for Global Programs & Studies for more than a decade, was named vice provost for global affairs. More at bit.ly/3u1KUgf

HOMECOMING AND REUNION WEEKEND

HOMECOMING.WFU.EDU
A summer anthropology course inspires a historic gift

By Kerry M. King (’85)

As an undergraduate, Tim Lam Sr. found a home at Wake Forest, thousands of miles from his childhood home in Hong Kong. After graduating, Lam (’60) returned to Hong Kong, but he loved coming back to Wake Forest, and he sent his sons, Tim (’93) and Marcus (’98), to his alma mater.

“Wake Forest was a place that accepted him,” Ellen Lam said of her husband, who died in 2012. “To be an international student in the ’60s was not an easy thing. But the long-lasting friendships he was able to make really endeared him to his school.”

Although he was a business major, Lam once said that the highlight of his education — besides the people he met — was a summer anthropology course taught by Professor E. Pendleton Banks, who later founded the University’s anthropology museum.

Lam had a successful business career in Hong Kong and spent decades collecting Chinese pottery from the Tang Dynasty (618-907). Shortly before he died, he donated his collection of more than 500 pieces to the anthropology museum so that students and others would gain a deeper understanding of Chinese culture.

Now, Ellen and her sons are making a major gift, the largest ever made by individuals to the anthropology museum and department, to honor Tim Lam Sr. The museum will be renamed the Timothy S. Y. Lam Museum of Anthropology. “It’s cementing Dad’s legacy with his beloved collection,” Marcus said.

The gift is “transformative” for the museum, said Andrew Gurstelle, academic director of the museum. The new name reflects its changing trajectory from a small teaching museum to one with world-class collections of more than 30,000 items, he said.

The Lams’ gift is creating two academic excellence funds, one for the museum and one for the anthropology department. The museum’s will fund traveling exhibits, including one on the Lam pottery collection, student research projects and research on the collections by visiting scholars. The department’s will support faculty research and community outreach. The gift also is endowing a faculty fellowship in the anthropology department to honor a full-time faculty member’s teaching and research.

The museum’s new name comes less than a year after it relocated to Palmer Hall, near its previous home in the anthropology building. The renovated building provides larger and more flexible gallery space — including space for rotating pieces from the Lam Collection — a collections and curation lab and a classroom. The anthropology department moved to adjacent Piccolo Hall.

Tim Lam Jr. is founding partner and executive director of The International School of Hospitality in Las Vegas, which offers continuing education and career development programs in hotel management, conference planning and hospitality operations. Marcus Lam is director of admissions and recruitment.

After Tim Lam Sr.’s death, his family established the Timothy S. Y. Lam Foundation to support education, research and training in the hospitality industry in Las Vegas. During the COVID-19 pandemic, the foundation has provided $200,000 in grants to hospitality workers who lost their jobs.

The Lam family has been a Wake Forest family since the late 1950s when Tim Lam enrolled in the College and his brother, Sam Lam (MD ’60), entered the School of Medicine. When they graduated, their father, Lam Chi Fung, president and founder of Hong Kong Baptist College and vice president of the Baptist World Alliance, was the Commencement speaker. A Lam cousin, Joe Lin (’77), later attended Wake Forest.

“Wake Forest was ingrained in me since a very young age,” Tim said. “Dad really enjoyed the learning experience and meeting so many great people. From a very young age, Marcus and I knew so many of the characters at Wake Forest.”

Tim and Ellen Lam enjoyed welcoming Wake Foresters — including Presidents James Ralph Scales and Thomas K. Hearn Jr. — to their home when they lived in Hong Kong. “He loved being an ambassador for Wake Forest in Hong Kong,” Marcus said. “He looked forward to taking Wake Foresters out to see the city.”

Lam received the Alumni Association’s Distinguished Service Citation in 1983, the first alumnus outside the United States to receive the award. After he and Ellen moved to Vienna, Virginia, in 1995, he served two terms on the College Board of Visitors.

In addition to collecting Chinese pottery, Lam also wrote a reference book, “Tang Ceramics: Changsha Kilns,” about more than 1,000 pieces in his and other collections. The pieces he gave to the anthropology museum included bowls, cups, teapots and small toys; it is the largest, most comprehensive group of ceramics from the Changsha kilns in the United States.
Deepening the Liberal Arts

Corey D. B. Walker launches African American Studies Program “that really is for everyone.”

By Carol L. Hanner

Corey D. B. Walker, the Wake Forest Professor of the Humanities and an author, is the inaugural director of the African American Studies Program, which will launch in the fall as a major at Wake Forest. He is jointly appointed in the Department of English and the Interdisciplinary Humanities Program.

In January, an anonymous donor made a $1 million gift to help establish the new program and create the Dr. Dolly A. McPherson Fund for African American Studies, named for the late professor of English who was the University’s first full-time Black female faculty member. Plans include developing a graduate certificate in addition to a major and minor, Walker says.

Walker was an external consultant on the University’s Slavery, Race and Memory Project. He previously was vice president of Virginia Union University and professor and dean of the seminary at its Samuel DeWitt Proctor School of Theology in Richmond, Virginia. He also has held faculty and leadership positions at Brown University, the University of Virginia, Winston-Salem State University and the University of Richmond. He was a non-resident fellow at the W.E.B. Du Bois Research Institute at Harvard University.

Wake Forest Magazine talked with Walker about his new role. The conversation has been condensed and edited for clarity.

What drew you to Wake Forest?
I was dean of the college at Winston-Salem State for four years. (Wake Forest Provost Rogan Kersh ’86) and I work really well together. We taught a class together — “Universities and Communities.” I interacted with colleagues at Wake and throughout the city. Working on the Slavery, Race and Memory Project gave me an up-close look at what Wake is doing. It really solidified that Wake Forest is a place to do some vital and important work.

Why is this the time for an African American Studies Program?
Wake is a top-30 institution in the nation and is one of the very few not to have an African American studies program. We’re going to launch a signature program that will be uniquely Wake. Students as early as 1969 were saying we need African American studies. So this has been 50 years in coming.

What are the core elements of the program you’re building?
One of the big pieces is serving as a hub of intellectual curiosity and intellectual creativity for the College and the broader University. African American studies brings and develops new knowledge about the human experience, drawn from the deep wells of the intellectual traditions, thoughts and cultures of people of Africa and of the African diaspora in the U.S.

Secondly, if we want to really deepen our understanding of the liberal arts traditions, you can’t do that without African American studies. African American studies really is for everyone. You can’t have a deeply humanistic education without understanding the varieties of ways in which people are human and the ways in which people develop knowledge, develop culture.

Thirdly, we have an opportunity to develop a signature approach (that) produces students who then go out and transform the world. That’s one of the key pillars of African American studies.

What surprised or interested you during the Slavery, Race and Memory Project?
Students at Wake Forest were debating questions around slavery in the 1840s and the 1850s. The majority of the time, those debates went for the maintenance and continuation of slavery. A century later in the 1950s and 1960s, there are students at Wake Forest who are not only pushing the board of trustees and the administration to desegregate, they’re also joining hands with their colleagues at Winston-Salem to end segregation in Winston-Salem. What are the possibilities of Wake Forest from that beginning and into the future?

What are your other interests?
I’m an avid college football fan. I also work with a number of folks on the Center for Faith, Justice and Reconciliation (in Richmond, where he, his wife and their daughters, ages 10 and 17, split their time until this summer.) That interfaith reconciliation work is one of my particular passions.
Two guys string some wire, and a rockin’ radio station is born

By Kerry M. King (’85)

WAKE FOREST STUDENTS couldn’t believe what they were hearing on their radios one night in the fall of 1946: “This is station W-A-K-E coming to you from the campus of Wake Forest College in Wake Forest, North Carolina, and presenting the Deaconlight Serenade, beaming musical good cheer to you and yours, styled Wake Forest way.”

What The Student magazine called “the new radio miracle” was started by roommates Alva “Al” Parris (’49, MD ’53, P ’75) and Henry Randall (’50) in their room in Mrs. Kent Barbee’s boarding house on Faculty Avenue. Parris, a founder of Theta Chi fraternity, loved radio and had a stack of records that he brought with him to college. Randall, a ministerial student, had already hosted a radio call-in show in high school.

The two “radio men” turned their room into a makeshift studio with two turntables, a Hallicrafters’ radio transmitter, a phono-oscillator and a crystal microphone and strung a 300-foot wire between trees to send a signal to friends next door. They broadcast a nightly program of popular music, opening with big bandleader Jimmy Dorsey’s “Contrasts” and ending with “The Star-Spangled Banner.”

Those early broadcasts marked the beginning of what eventually became WFDD, a National Public Radio affiliate station licensed to Wake Forest. WFDD is celebrating its 75th anniversary this year.

Parris and Randall had bigger dreams of a station that could be heard all over campus and received approval to transmit over the campus power lines. They had to raise money for equipment and collected $9.70 at a basketball game, $20 from the Baptist Student Union, $200 from the board of trustees and other donations from fraternities. Brothers David Herring (’51) and Ralph Herring (’49) and a Raleigh radio engineer built a 50-watt transmitter.

The station officially went on the air at 580-AM on April 19, 1948, with the playing of “Dear Old Wake Forest” from the Groves Stadium radio booth. The highlight of opening night was a replay of Charlotte station WBT’s popular Saturday night “Midnight Dancing Party” that had been taped earlier.

Early programming included news and weather reports and classical and popular music. Deaconlight Serenade — “music for romancing” — and live Wake Forest football, basketball and baseball games quickly became popular. The fledgling station soon relocated to an old Army barracks and changed its call letters, which were already being used by another station, to WFDD (Wake Forest Demon Deacons).

With the move to the new campus in 1956, WFDD moved into a large suite of offices and studios in “Pub Row” in Reynolda Hall. The station was run entirely by students until Julian “Sonny” Burroughs (’51, P ’80, ’83), who had been student station manager in 1950, joined the faculty in 1958 to teach speech communication and to oversee WFDD.

Under Burroughs’ leadership, WFDD became a noncommercial educational FM station in 1961. Burroughs also was involved in some of the early planning for National Public Radio, and WFDD became the first NPR station in North Carolina in 1970.

Students continued to host programs, including the classical music Evening Concert, the rock-centric Deaconlight, and a lighter rock morning show, Renaissance. Rick Reynolds (’71) shared his memories of those times in a Facebook group, Deaconlight. “Sunday nights at 11 p.m., we rocked the joint. Hopefully, Dr. Burroughs had gone to bed by then. We had no official playlist — it was up to each DJ. Grateful Dead, Led Zeppelin, Black Sabbath, Janis Joplin, Elton John, the James Gang, The Band, Mountain, James Taylor, Rush, Neil Young and Crosby, Stills, Nash & Young. The best of times.”

After Burroughs stepped down as faculty director in 1981, students became less involved in the station. Several years later, students again started their own station, appropriately named WAKE Radio. Today, WFDD broadcasts NPR and BBC programming, award-winning news and public affairs programming and classical music from a restored farmhouse on campus.

Many “Big FuDD” alumni went on to careers in radio and journalism. “The WFDD studio in Reynolda Hall was a premier environment for students to learn how to channel their creativity in a professional environment,” said DD Thornton Kenny (’81), the last host of Deaconlight. “Students produced news programs and created a sports network and the late-night music program Deaconlight that was, and still is, legendary.”

DD Thornton Kenny shares stories of Big FuDD alumni at WakeForestRadio.com and facebook.com/groups/deaconlight.

For information on WFDD’s anniversary celebration, visit wfdd.org/75th.
Connecting Virtually

Since COVID-19 shut down in-person events in March 2020, more than 150 alumni events have been held virtually, from Homecoming 2020 and Calls to Conversation to the Lovefeast and the Alumni Admissions Forum. Virtual events have opened up a new world in alumni programming, both through new events and by attracting thousands of alumni who prefer an online format and others who can’t attend campus events. While we can’t wait to see alumni in person again, we’ll continue to offer virtual events to engage and connect alumni.

Homecoming Weekend 2021 | Oct. 29-30

We’re making plans for a Homecoming & Reunion Weekend twice as big as normal to make up for missing last year. While it’s still too early to tell what the fall will look like, we hope to celebrate reunions for undergraduate classes ending in 1 and 6, along with the classes ending in 0 and 5 that missed out last year. To volunteer for your reunion committee, email reunion@wfu.edu

Pro Humanitate Days | #GoodWearsBlack

Pro Humanitate Days in April focused on hunger and food insecurity. Hundreds of alumni gave back to their communities, including:

- Chuck Neaves (’70, JD ’82, P ’12) and Susan Templeton Neaves (’80, P ’12) of Elkin, North Carolina, who planted and harvested vegetables for the community.
- Ashley Snead Crouse (’11) and Michael Crouse (’10, MS ’12) of Seattle, who donated to Food Lifeline.
- Elisabeth Sheridan (’05), who stocked a food bank in Philadelphia with fresh foods and nonperishables.

Wake Women’s Week

More than 500 women registered for one or more of the 31 virtual events on professional and personal development in March. The week’s signature event, “Closing the Gender Gap: A Panel Discussion with Industry Leaders,” featured Alex Reyes Schroeder (’06, JD ’09), Jackie Krese (P ’23), Melissa McGhie Proctor (’02), MJ Sweeney (’77), Tina Thornton (’93) and Dr. Julie Ann Freischlag, CEO of Wake Forest Baptist Health, dean of the Wake Forest School of Medicine and chief academic officer of Atrium Health Enterprise.

The Alumni Council wishes to thank Dr. Hatch for his incredible leadership over the last 16 years. He has anchored our beloved alma mater in our core values, while at the same time being forward-thinking and ambitious, and throughout the course of his tenure has helped us to grow tremendously. We are forever grateful. Sending our heartfelt appreciation and best wishes to Dr. and Mrs. Hatch in their next chapter.

— Alex Reyes Schroeder (’06, JD ’09)  
President, Wake Forest Alumni Council

### 1940s

**Ed Wilson (‘43, P ’91, ’93)** has written a book, “Songs of Wake Forest,” about many of the Wake Foresters he’s known the last eight decades, from professors and classmates he met on the original campus to professors, deans and presidents he served alongside in Winston-Salem. More at bit.ly/3qsph1

### 1960s

**Richard Filippi (‘62)** is a retired vice president with Citigroup and lives in Zurich. After graduating, he served two years as a headquarters battery executive officer with the 3rd Armored Division Artillery in Germany. He moved to Switzerland in 1965 and earned a master’s in economics at the University of Zurich, where he met his wife, Irene. He worked for three banks in Switzerland and earned an MBA from the Institute for Management Development in Lausanne. As an Army Reserve officer, he completed the field artillery officer advanced course at Fort Sill (OK) and graduated from the U.S. Army Command and General Staff College. He served in six NATO countries and retired as a lieutenant colonel after 28 years of reserve and active duty. He looks forward to returning to Wake Forest for his 60th reunion in 2022.

**H. William “Bill” Constany (‘64)** has written “Noncompete Law, Second Edition” (LexisNexis/Matthew Bender). He is a retired North Carolina Superior Court judge and an active arbitrator and mediator. He received a Marquis Lifetime Achievement Award from Marquis Who’s Who in America. Constany and his wife, Debbie, live in Charlotte and celebrated their 50th wedding anniversary in April 2020.

**Dallas Clark (‘65, JD ’68)** has written a legal thriller, “The Investigation Officer’s File” (Black Wrote Writing). The story was inspired by events he experienced as a legal officer in the U.S. Marines in Vietnam and Okinawa in 1969. Clark is a retired attorney living in Greenville, NC.

**Samuel T. Gladding (‘67, MAEd ’71, P ’07, ’09)** was in the top 5% of authors of peer-reviewed articles in the nation’s top 22 counseling journals between 2000 and 2017, according to a study published in the Wisconsin Counseling Journal. Gladding is a professor in the Department of Counseling at Wake Forest and the author most recently of the 6th edition of “The Creative Arts in Counseling” (American Counseling Association, 2021).

### 1970s

**James E. Cross Jr. (‘70, JD ’73)** was one of 11 attorneys awarded the North Carolina Bar Association 2020 Citizen Lawyer Award. He was also named to the 2021 North Carolina Super Lawyers list for estate planning & probate. He practices law at Cross & Currin LLP in Oxford, NC, with Sam Currin (‘68, JD ’71) and Walker Brummitt (‘17).

**Jim Bailey Jr. (‘72, JD ’75)** retired after 40 years of practicing law in Wilmington, DE. He and his wife, Connie, are enjoying more time with family, including their three daughters and five grandchildren. He enjoys staying in touch with the Wake Forest community and would love to hear from fellow alums.

**Robert J. Carroll (‘74)** was named acting Morris County (NJ) prosecutor, pending state Senate confirmation of his nomination by the governor for a five-year appointment. Carroll had been director of the law department at the New Jersey Turnpike Authority after a career as a private attorney and chief of the state’s Organized Crime and Racketeering Task Force in the state Office of the Attorney General. Among the mob figures he helped convict was killer Richard “The Iceman” Kuklinski. Carroll was a scholarship football player at Wake Forest. More at bit.ly/3r6oYhD

**Jimmy L. Myers (’75)** was appointed chief district court judge for North Carolina District 22B (Davidson and Davie counties) by North Carolina Supreme Court Chief Justice Paul Newby. Myers has been a judge in the district since 1994. He lives in Advance, NC.

**Deb Richardson-Moore (’76)** received the first Humanitarian Award from United Housing Connections (UHC) of Greenville, SC, for her work to find housing solutions for the city’s homeless people. UHC is naming a new community center that will provide services for homeless people in her honor. Richardson-Moore is the retired senior pastor of Greenville’s Triune Mercy Center, a nondenominational church that serves homeless people, and the author of four mystery novels and a memoir about her work at Triune.

**Mary Jo “MJ” Sweeney (’77)** is on her third career after retiring from the U.S. Navy and the corporate world. She is doing pro bono and paid consulting work with military and veteran non-profits helping service members transition to the private sector. She is on the executive committee of Decorated Deacs, a Wake Forest community that connects, honors and supports military members. She lives in Crownsville, MD.

**Tommie O’Toole (’78, P ’07)** retired from sports journalism after nearly 43 years, including the last 20 years at USA Today. He also worked at the Knoxville News Sentinel, The Atlanta Journal-Constitution and Scripps Howard News Service. He covered 14 Olympics, 18 Final Fours, six Masters tournaments, five Super Bowls and five Wimbledon tournaments, but he gladly sat in the stands for Wake Forest’s 2007 Orange Bowl game.

**William Roebuck (’78, MA ’82)** was named executive vice president of the Arab Gulf States Institute, a think tank in Washington, DC. He retired from the U.S. Department of State last year after 28 years. Roebuck served as U.S. Ambassador to the Kingdom of Bahrain from 2015-2017 and received the State Department’s Award for Heroism for his service in Syria from 2018-2020.
Ashley H. Story (’78, P ’13) was named chief operating officer for the newly combined firm Truliant Federal Credit Union, one of the 50 largest law firms in the country. Story was department chair for real estate and finance at Truliant. He continues as a partner in the combined firm. He is based in the Raleigh office.

Dennis A. Wicker (JD ’78) was recognized in the 2021 edition of The Best Lawyers in America for government relations. He is a partner in the Raleigh office of Nelson Mullins Riley & Scarborough LLP. Wicker, who lives in Sanford, NC, was North Carolina’s lieutenant governor from 1993-2001. He also served six terms in the North Carolina House of Representatives, including two terms as majority leader.

Nancy J. Wilkie (’78) released a compilation of original music titled “Songs of the Sun” on iTunes, Spotify and Amazon. She worked in the biotech industry for 30 years before retiring to focus on writing and composing. She released a 2019 book of short stories, “Seven Sides of Self,” and created a line of greeting cards and prints. She lives in Brookeville, MD.

Bob Singer (JD ’79) was named to the 2021 North Carolina Super Lawyers list for banking law. He is an attorney at Brooks Pierce in Greensboro, NC.

1980s

John David Bryson (’80, JD ’85) was named to the 2021 North Carolina Super Lawyers list for criminal defense law. He is a partner at Wyatt Earle Harris Wheeler LLP in High Point, NC, and has been an adjunct professor at Wake Forest School of Law since 1994.

Marshall “Whit” Walker Jr. (’80) retired after 26 years as a neonatologist at the University of South Carolina School of Medicine in Greenville, SC. A former clinical associate professor of pediatrics, he co-authored more than 40 articles in peer-reviewed journals and traveled multiple times to Vietnam to help modernize its neonatology systems. He was named National Clinical Researcher of the Year by Pediatric Medical Group.

Cosby Davis III (MBA ’81, P ’08) was named chief financial officer at Truliant Federal Credit Union, the largest credit union in North Carolina’s Triad region. He was CFO at Allegany Federal Credit Union. Both institutions are headquartered in Winston-Salem.

John D. Martin (’81) was named to the 2021 North Carolina Super Lawyers list for medical malpractice and employment & labor law. He is a trial lawyer and managing partner at Cranfill Sumner & Hartzog LLP in Wilmington, NC.

Warren Stephens (MBA ’81) joined the Wake Forest University Center for the Study of Capitalism as an executive affiliate. He is chairman, president and CEO of Stephens Inc., one of the nation’s largest family-owned financial services firms, based in Little Rock, AR.

Thomas Preston Walk (JD ’81) served two terms as president of the board of the disAbility Law Center of Virginia, a nonprofit that protects and advocates for Virginians with disabilities. He lives in Tazewell, VA.

James J. S. Johnson (’82) appears as a wildlife ecology expert in the ongoing DVD series “Amazing Animals of Alaska,” providing ecological highlights about Alaska’s salmon, polar bears and sea otters. He taught biosciences and ecology at Dallas Christian College and elsewhere and was a lecturer for international cruise ships.

Eric R. Spence (JD ’82) was named to the 2021 North Carolina Super Lawyers list for real estate law and to Business North Carolina’s 2021 Legal Elite for real estate law. He is of counsel at Ragsdale Liggett PLLC in Raleigh.

Kurt E. Lindquist II (JD ’83) joined Cozen O’Connor’s commercial litigation practice in Washington, DC, after 12 years at Womble Bond Dickinson LLP in Charlotte. He splits his time between Charlotte and Washington.

Herb Whitesell (’83) was honored by accounting firm Davidson, Holland, Whitesell & Co. PLLC for 30 years with the company. Whitesell, a CPA, lives in Hickory, NC, with his wife, Katy, and has two adult daughters, Jordan and Cassidy.

Joanne O’Brien Beam (’84) was named director of development at Charlotte Latin School, a nonsectarian K–12 school in Charlotte. She was named one of the “Top 25 Women in Business” by the Charlotte Business Journal in 2013. She has worked in banking and nonprofit consulting and was founder and president of Capstone Advancement Partners. She began her career as associate director of advancement at Wake Forest.

Irene Kimel Johnson Cahoon (MAEd ’80), Oct. 17, 2020, Wilmington, NC. She was a special-needs counselor in New Hanover County (NC) Schools.

Victoria “Vikki” Farmer Curtis (JD ’80), Jan. 15, 2021, Richmond, VA. She was an attorney with Virginia Electric & Power Co., now Dominion Energy, for 15 years before becoming a teacher and librarian at Good Shepherd Episcopal School and Trinity Episcopal School in Richmond.

William “Lecil” Henderson II (’80), Nov. 22, 2020, Charlotte. He was a jewelry designer and owner of The Henderson Collection by Lecil. He was president of Leadership Charlotte and the Charlotte-Mecklenburg Historic Landmarks Commission.

Thomas Gray Gallaher (’81), Nov. 6, 2020, Winston-Salem. He worked in real estate and was a homebuilder. He was preceded in death by brother John K. Gallaher Jr. (’75). Survivors include brother James A. Gallaher (JD ’82).

Tony Milton Transou (MBA ’81), Feb. 12, 2021, Clemmons, NC. He served in the U.S. Army as a military intelligence officer. He was retired director of finance at Winston-Salem Dental Care.

William Paul Brink (MBA ’82), Oct. 28, 2020, Phoenix. He was the retired CFO of electrical equipment manufacturer Square D.

Michael Lee Roberson (JD ’83), Dec. 6, 2020, Cazenovia, NY. He served in the U.S. Navy and was an attorney for more than 35 years, the last 28 at Carlisle Companies Inc.

Rex Gardner Waterbury (MD ’83), Sept. 17, 2020, Virginia Beach, VA. He was an OB/GYN in North Carolina and Virginia for 34 years, the last 12 at Tidewater Physicians for Women.

Robert Emmett Jones III (’84), Feb. 14, 2021, Greenville, NC. He was a real estate broker with Aldridge & Southender Realtors in Greenville.

Blake E. Lundberg (’84), Nov. 9, 2020, Carmel, IN. He retired as vice president and general manager of the Sports Licensed Division at Adidas. He was preceded in death by his wife, Rebecca “Becky” Forrester Lundberg (’85). He was a member of the Samuel Wait Legacy Society.

Johnny Dale Massie II (’84), Oct. 10, 2020, Lexington, KY. He was a manager in research and development at Lexmark International, where he patented many laser-printer systems.

Ronnie K. Burgess (’85), Jan. 4, 2021, Myrtle Beach, SC. He was an assistant principal at Carolina Forest High School in Myrtle Beach and a longtime educator with Horry County (SC) Schools. He was a defensive back on Wake Forest’s football team who held the school record of 17 career interceptions until 2008.

Christopher Neil Chafin (’85), Jan. 25, 2021, Winston Salem. He was director of counseling and student disabilities at Guilford Technical Community College in Jamestown, NC.

Marjorie Rowe Mann (JD ’85), Nov. 6, 2020, Asheville, NC. She practiced law in Charlotte and Asheville and owned Asheville Gymnastics.

Jim Lee Willcox Jr. (MBA ’85), Jan. 2, 2021, Kennesaw, GA. He was an industrial engineer and engineering consultant in the Atlanta area.

Randall “Randy” David Avram (JD ’86), Jan. 14, 2021, Raleigh. He was a partner at Kilpatrick Townsend & Stockton, where he led the labor and employment team and represented many Fortune 100 companies.

Douglas Michael Ellis (’86), Oct. 3, 2020, Charlotte. He was preceded in death by his parents, Emmett Ellis (’36) and Kathryn Ellis.

Marjorie Wahlberg McKone (MA ’86), Nov. 18, 2020, Winston-Salem. She was a homemaker whose family called her “the heart and soul of our home.” Survivors include her husband, Robert McKone (MD ’58), and son Mark McKone (’84).

Richard Leo Crouse (JD ’87), Nov. 4, 2020, Bermuda Run, NC. He founded two commercial real estate mortgage companies, including Crouse & Associates, which he owned with his
Lana Jolley Henkel ('87), Feb. 6, 2021, Boiling Springs, NC. She was a music instructor and band director for more than 30 years in the Cleveland County (NC) Schools. She was preceded in death by her parents, Lansford Jolley ('49) and Cothenia Jolley. Survivors include son Jonathan Thomas Henkel ('21).

W. Charles Campbell ('88), Nov. 29, 2020, Charlotte. He was CEO and managing partner of Flagship Healthcare Properties LLC and chair of the board of directors of Flagship Healthcare Trust, the firm’s real estate investment trust. The Charlotte Business Journal named him one of the area’s most admired CEOs in 2018.

Nicholas Emil Petrarca Jr. ('88), March 17, 2021, Clearwater, FL. He worked in the financial industry nearly 30 years, most recently as a fixed income trader at Raymond James & Associates in the Tampa Bay area. Survivors include daughter Elaine Petrarca ('18).

Robert D. Grigg IV ('89), Nov. 2, 2020, New York City. He was on the men’s soccer team and a member of Kappa Sigma Fraternity at Wake Forest. He was an executive at JP Morgan Chase & Co., where he had worked for 27 years. Survivors include his wife, Allison Reid Grigg ('89), and daughter Ashley R. Grigg ('22).

Lisa Smith Hodges (MD ’93), Jan. 11, 2021, Shreveport, LA. She was an instructor at Louisiana State University School of Medicine and a physician specializing in pediatrics, internal medicine and infectious disease.

John Paul Gibson (JD ’96), Dec. 4, 2020, Charlotte. He was a law librarian who had worked at Kilpatrick Townsend & Stockton LLP in Charlotte.

Lis Moreno Cravens (MBA ’02), Nov. 3, 2020, Bowling Green, KY. A native of El Salvador, she was executive vice president of Fruit of the Loom.

William “Rusty” Griffin III (MBA ’02), Nov. 26, 2020, Mount Pleasant, SC. He owned Tremont Specialty, a custom homebuilding and renovations company in the Charleston, SC, area. Survivors include his parents, William Griffin Jr. (MD ’64) and Betty Griffin.

Andrea Marie Carden ('04), Feb. 14, 2021, Winston-Salem. She was valedictorian of her high school in Surry County, NC, and earned a master’s degree in public policy from UNC Wilmington. She attended the doctoral program at the University of Maryland, Baltimore.

Allison Wood Criswell ('07), Sept. 5, 2020, Kings Park, NY. She was a director at RBC Capital Markets. Survivors include sister Meghan K. Wood ('12).

Myra June Parsons ('07), Dec. 30, 2020, Mount Airy, NC. She was a clinical social worker in her native Surry County (NC).

Paul Frederick Nocida (MBA ’09), Feb. 24, 2021, Mount Pleasant, SC. He was an operational manager at MWV Specialty Chemicals (now Ingevity) for 10 years. Most recently he was the owner of a management consulting firm, Nocida Solutions, in Mount Pleasant.

Nicholas “Nick” Ogden Watts (’10), Feb. 10, 2021, Edmond, OK. He was in his last year of law school at Oklahoma University. He was on the debate team at Wake Forest before transferring to the University of Oklahoma, where his debate team won two national championships, and he was named top speaker at his last championship tournament.

Brian Robert “Rob” Zawrotny (JD ’11), Nov. 16, 2020, Winston-Salem. He was an attorney at Novant Health in Winston-Salem and rose to director and assistant general counsel.

Friends, Faculty, Staff, Students

James Dale Ball, Jan. 8, 2021, Winston-Salem. He taught at the School of Medicine and practiced radiology and nuclear medicine for 38 years at Wake Forest Baptist Health. He received the Quinn Award for Teaching Excellence in 2007 and was named associate professor emeritus in 2015. He served in the U.S. Air Force, attaining the rank of major.

Sylvia T. Bell, Dec. 1, 2020, Winston-Salem. A native of Morehead City, NC, she moved to Winston-Salem in the 1960s to attend nursing school at N.C. Baptist Hospital. She joined Wake Forest’s Student Health Service in 1981 as a nurse and later was associate director. She was honored numerous times for her contributions to student health. She retired in 2011 after 30 years. Survivors include son Tim Bell ('89).

M. Gene Bond, Dec. 6, 2020, Winston-Salem. He was a professor at the School of Medicine for nearly 30 years. He specialized in using ultrasound technology to detect atherosclerosis and retired in 2003 as director of the Division of Vascular Ultrasound Research. Survivors include daughter Katie Bond Ford ('00).

Lois M. Buerkle, Dec. 18, 2020, Winston-Salem. She was an obstetrical nurse, retiring from the School of Medicine as a nurse educator specializing in high-risk obstetrics. Survivors include her husband, Richard A. Brodkin (MD ’75).

Gary Lee Eckenroth, Dec. 30, 2020, Winston-Salem. He joined Wake Forest in 1998 as the first University compliance officer after 12 years as vice president of human resources for Planters Life savers Co., a division of RJR Nabisco. He was a longtime member of the College Board of Visitors who, in 2020, became an inaugural member of the College Board of Visitors Emeritus program.

Sharon Jones, Feb. 7, 2021, Winston-Salem. She was a beloved cafeteria worker on campus who worked in the Fresh Food Company (“The Pit”) for 23 years. Known to many as “Ms. Sharon,” she is remembered by her friendly greetings and funny stories.

Adele LaBrecque, Feb. 11, 2021, Santa Fe, New Mexico. She was a longtime member of the College Board of Visitors and a longtime member of the College Board of Visitors Emeritus program.

Chuck Mills, Jan. 18, 2021, Honolulu. He was head football coach at Wake Forest from 1973-1977 and was known for his “pigskin diplomacy” for bringing American football to Japan. Mills was head coach at Utah State before coming to Wake Forest, and he later coached at Southern Oregon and was football coach and athletic director at the U.S. Coast Guard Academy, before retiring to Hawaii. Mills took his Utah State team to Tokyo in 1971 for an exhibition game, the first time a U.S. college team had played in the country, and he returned with his Wake Forest team in 1974. The Chuck Mills Trophy, given to Japan’s best college player, was established in 1974. He was inducted into the Utah State Athletics Hall of Fame in 2008 and the Japanese American Football Hall of Fame in 2018.

Pearl Martin Sessums, Dec. 11, 2020, Winston-Salem. She was an accounts payable representative in the Controller’s Office (now Financial Services) at Wake Forest from 1990 until retiring in 1999.

Robert W. Simpson, April 14, 2021, High Point, NC. He was a part-time dance instructor at Wake Forest who taught social dance for 24 years. He also operated the Biltmore Ballroom Dance Studio in High Point.

Raymond Louis “Ray” Wyatt (‘48), Nov. 26, 2020, Winston-Salem. He was a longtime biology professor at Wake Forest before retiring in 1992. A native of Spencer, NC, he attended Mars Hill College and Wake Forest and earned his master’s degree and Ph.D. from UNC Chapel Hill, specializing in botany. After working as an assistant professor at UNCG, he joined the Wake Forest faculty in 1956, the year Wake Forest moved to Winston-Salem. He specialized in plant taxonomy and created the department’s herbarium. He led popular student field trips to the North Carolina coast to study Venus flytraps and other native plants.
Inspiration Abounds at WordsAwake4!
A virtual feast of the written word celebrates new Writers Hall of Fame inductees.

By Carol L. Hanner

The online conference honoring the four newest members of the Wake Forest Writers Hall of Fame was called WordsAwake4!, but the fêted alumni and the speakers who shared on the art and craft of writing went far beyond words.

Emotional gratitude, visions of life purpose and a sense of wisdom acquired at the University and beyond infused the webinar held April 16-17.

The four inductees, announced last year as the pandemic postponed the celebration, are novelist, film critic and screenwriter Stephen Amidon (’81), journalist and author Steve Duin (’76, MA ’79), poet, novelist and editor Clint McCown (’74, MA ’78) and publisher and digital journalism innovator Mike Riley (’81). (See profiles of them at bit.ly/3tfcfuV)

Also honored was Tom Phillips (’74, MA ’78, P ’06), the man behind WordsAwake! from its inaugural celebration in 2012, when the University inducted the first 15 members of the Writers Hall of Fame. Phillips retired as associate dean and director of the Wake Forest Scholars program last year.

Dean of the College Michele Gillespie presented Phillips with a book of warm letters from colleagues and those he has mentored. The “Gentleman Scholar,” as his memento book calls him, worked 46 years at Wake Forest, in admissions, for the provost and dean of the college and helping students win Rhodes, Fulbright and other postgraduate scholarships. (Read about Phillips at bit.ly/32p5ZFk)

WordsAwake4! viewers were treated to panelists who performed poetry readings and talked about storytelling, screenwriting and writing leadership. A keynote by Shane Harris (’98) laid out his experiences as a national security reporter and how journalism, sources and readers have changed. (Read more at bit.ly/3dV5Y2c)

Grumpy Bookworm
Kicking off the conference was featured speaker Dhonielle Clayton (’05). A self-described “grumpy bookworm" as a child, Clayton just wanted to be left alone to read books, “my first friends.” After Wake Forest, she graduated to “grumpy librarian and teacher,” she says.

Today, she is a much-honored author of young adult fiction, co-founder of a company called Cake Literary and “a tiny tyrant” advocating for diversity in literature for young people. Despite receiving ugly emails and even death threats, Clayton has pushed to increase underrepresented characters, in gender or sexual identification, racial, ethnic, cultural and religious status or the presence of disabilities.

She was motivated by a heartbroken young student originally from Burkina Faso in West Africa who was crushed when Clayton, then a middle-school librarian, couldn’t fulfill his request for books with fantasy or science fiction heroes of color, despite an exhaustive search.

“He was devastated,” Clayton said. “That was only seven years ago.”

Today, she devotes herself to multi-pronged efforts to ensure that all children can see themselves in the pages of books. She is the volunteer chief operating officer of We Need Diverse Books, a nonprofit at diversebooks.org that offers feedback and resources to the publishing industry, educators, librarians and authors, from writer grants to an app for finding diverse books.

“Story is our connection to each other. And it’s the one instrument we have that we can all understand.”

The honorees share

Those named to the Hall of Fame shared how Wake Forest influenced them. Their comments, edited and condensed, come from a panel discussion and the induction ceremony.

Stephen Amidon, author of seven novels: (Wake Forest) absolutely shaped me as a writer. I found it a really liberating place. I had great teachers, but it was the extracurricular activities that really fired me up, the opportunity to put on a couple of plays with my peers and travel (to Casa Artom in Venice, to Ireland and to Paris). I had a lot of people at Wake Forest who really believed in me as a writer.

I also have a very personal reason for valuing Wake Forest in my evolution into a writer. That’s because I met my wife (Caryl Casson) there. We have four wonderful children. I was able to find the woman and the family that made it all possible for me.
Steve Duin, sports writer, political columnist and eventually metro columnist at The Oregonian in Portland, Oregon:

Anytime I knocked on the door at Wake, it was opened by someone like (English professors) Ed (Wilson ’43, P ’91, ’93, provost emeritus), Laura Rice, Doyle Fosso (P ’81), Michael Roman or (Sports Information Director) Charlie Dayton (’72). When (Professor Emeritus of History) Jim Barefield shook his skeptical head and said, yes, I could join him in Venice in the fall of ’75, this University changed my life, my boundaries and my sense of possibility.

When Ed Wilson realized that I had not successfully completed my study abroad experience by marrying into an Italian family, Wake Forest paid for another semester abroad in London, during which I met the Italian, albeit another Wake student from Potomac, Maryland, who became my wife (Nancy Natelli Duin ’79).

Because Wake facilitated every one of my trials and errors, it helped eliminate all confusion about what I was born to do. I belonged in a raucous newsroom for 40 years, as it turned out. To discover that my alma mater is determined to set a plaque somewhere on campus that documents just how blessed I’ve been … (pausing with emotion) … I don’t have the words to express my gratitude.

Steve Duin

Clint McCown, professor of writing at Virginia Commonwealth University and the Vermont College of Fine Arts:

Virtually every good thing that came to me in my adult life was through my acceptance to Wake Forest.

As an undergrad, I had the usual support from the usual titans, but I have to say I was no star. I was mostly a theater geek, and I practically lived on the top two floors of the library, which was where all the plays were performed. My guiding lights were Harold Tedford (P ’83, ’85, ’90), Don Wolfe and the indomitable Mrs. Caroline Sandlin Fullerton. Every lesson I learned at Wake and elsewhere about creating a character onstage applied equally to creating a character on the page.

I’ve never been able to settle on just one genre, and if anybody asked me why, I would have no idea how to answer. But a better question is why do I bother to work in any genre at all?

Well, that question I can answer because I learned it from Shakespeare while I was at Wake. In “Hamlet,” our tragic hero gives the troupe of players a lesson in their art. He tells them “to hold, as ‘twere, the mirror up to nature.” And, of course, he was talking about human nature. The true performer or writer shows us who we truly are and also for well or ill who we are capable of becoming. So the difference writing makes is pretty simple. It makes all the difference in the world.

Mike Riley, journalist and president, CEO and editor-in-chief of The Chronicle of Higher Education:

In high school I had a senior year English teacher named Lamar Helms (’71, MA ’75). He inspired me to pursue words and writing, and he convinced me to go to Wake Forest, and a small scholarship didn’t hurt, either. What I was struck by when I got there was just how amazing the English faculty was. Ed Wilson, throughout my career, I would keep getting these little notes from him at different times and different places.

Then there was Bynum Shaw (’48, P ’75). He inspired me to pursue journalism, persuaded me to become the editor of the Old Gold & Black my senior year. In 1981, it was the recession. I was writing letters to newspapers everywhere, and they were all rejecting me, and Bynum finally sent me to Lexington, North Carolina, to interview (at the Lexington Dispatch) with a fellow named Ralph Simpson (’68), who offered me a job. When I went to Bloomberg Government in 2010, who was there? The infamous Al Hunt (’65, D.Litt. ’91, P ’11), who is a mentor and a friend.

Throughout all of this Wake Forest is the thread that connects everything, and it’s around words. It’s around story. It’s around people. It’s around pursuit of truth.

Mike Riley
ON THE NIGHT OF my birth, Wake Forest was in the NCAA tournament. My mother’s water broke, and my dad said, with regard to a trip to the hospital, “You’ll need to wait until the game is over.”

Growing up in Winston-Salem, Wake Forest was woven into my soul. Wearing homemade black and gold dresses to ACC games, I became a member of “Cal’s Club,” named for football coach Cal Stoll. Charles “CD” Davis (’71, MALS ’97, P ’96), 1971 ACC Player of the Year, was my first African American hero, even as Winston was embroiled in racial tensions over desegregation. In high school, basketball coach Carl Tacy (P ’82) and his wife were my Sunday school teachers. I was destined to be a Demon Deacon.

A demon deacon: what a curious conflation of good and evil. Has it ever struck you that there is something strangely powerful about our unusual mascot? Compared to a ram or a wolf, how does it stand a chance? As I write this in January, I have no idea where we will soon be as a nation, but I am convinced we need access to this hidden insight. A public narrative of good against evil has claimed our conscious-ness, and far too many of us believe we know clearly who is “in” and who is “out,” despite the fact that some of our origin stories — e.g., Genesis 2-3 — tell us the very desire to know good and evil is the root of our falling. A demon deacon wreaks havoc with either/or thinking.

Here are some Demon Deacons who revealed this truth to me.

In 1983, I asked to meet with Glenn Hinson, visiting professor in the Department of Religion and a renowned church historian. For four years I had been an active member of campus Christian groups, but suddenly, once I decided to attend Princeton Theological Seminary, I lost most of my Christian friends. Princeton was where much of the early fundamentalist-modernist debate over the inerrancy of Scripture began. This fundamentalist doctrine maintains that Scripture, in its original manuscripts, contains nothing contrary to fact and is free from error. Princeton had not accepted this teaching, and my friends, mostly inerrantists, feared for my salvation.

Dr. Hinson calmly selected books from his shelves saying, “Well, you could look at it this way, or this way or perhaps this way … depending upon what time in Christian history or what theological perspective.” Instead of telling me what to believe or think, he exposed me to the breadth of experience and belief within 2,000 years of Christian history, all within the span of a one-hour meeting. He introduced me to Dietrich Bonhoeffer, an imprisoned Lutheran pastor of the German “Confessing Church” that opposed Nazism, and to his theological ideas of God as the “beyond in the midst” and “only a suffering God can save.” Such words of Bonhoeffer, who sadly knew from too much experience that good people do indeed do terrible things, toppled my dualistic categories.

While at the Worrell House in London, Dr. Carl Moses, through his comparative politics class, helped me to see that democratic socialism is not a misnomer. Those two things — democracy and socialism — enable us to uphold individual freedoms even as we serve the collective good.

My freshman roommate, Zenia Raudsepp (’83), who hailed from New Jersey, probably did not know what to think of such a Southern girl and, on Day One of freshman year, I met my first “damn Yankee.” Our mutual respect for our differences evolved to the most lasting friendship I have. She became a little Southern. I became more Yankee.

Those large Demon Deacon shoes in my experience enable us to stand firmly while we are pushed and shoved by those who would have us trample our opponents. My life as a minister, a professor, a mother, a friend and a business owner has been shaped by this curious mascot who symbolizes humble courage to me, reminding me that while some may be at fault, all are responsible. Game over.

Jeanne Matthews Sommer (’83) has a master’s of divinity degree from Princeton Theological Seminary and a Ph.D. in theology and comparative literature from Northwestern University. She was chair of the religion department at Warren Wilson College from 1995 to 2012. She owns Hidden River Events in Swannanoa, North Carolina.
SHOW HUMANITATE

Because our world can never have too many examples of what it means to care beyond ourselves.

GIVING.WFU.EDU
‘Songs of Wake Forest’

To celebrate those Wake Foresters the University has lost, retired professor, dean and provost Edwin G. Wilson (‘43, P ’91, ’93) offers a new book, “Songs of Wake Forest.” Wilson recalls many of the classmates, professors, deans and presidents he’s known during eight decades, with more than 50 eulogies and remembrances he gave at memorial services, retirements and other gatherings from 1978 to 2017.

“I wanted them, collectively and individually, to capture the spirit of Wake Forest as I saw it and understood it,” Wilson said at a virtual book launch in December. Read more at bit.ly/3qzspv1

The book is available at the College Bookstore or Bookmarks in Winston-Salem. Proceeds go to Z. Smith Reynolds Library. The library invites tributes to Wilson or your own “song” of Wake Forest at songsfordrwilson@wfu.edu or mail them to ZSR Library, Special Collections & Archives, P.O. Box 7777, Winston-Salem, NC 27109.
