

# Juris Doctor/ Master of Health Administration Joint Degree

## Quick Facts

## Become a Leader at the Intersection of Law and Health Care

In a rapidly-evolving healthcare landscape, Wake Forest's JD/Master of Health Administration (JD/MHA) joint degree program prepares you to practice law and be a business leader in the healthcare setting. With an emphasis in healthcare leadership, you will gain the skills and knowledge for high-impact roles in hospital systems, physician practices, health insurance companies, pharmaceutical and drug device companies, and more.

### Details

- Complete the JD/MHA in as little as 3.5 years
- Online, asynchronous MHA courses, starting after the first year of law school, allow for flexibility, including the ability to take courses part-time either during normal terms or summer terms
- 18 fewer credits required to complete the program compared with obtaining each degree separately
- Students will continue to pay their law school tuition, less any scholarships. Also, students will pay a program fee reflecting 75% of the MHA program's normal tuition.

### Skills Acquired

In-depth understanding of healthcare policies, regulations, and legal frameworks

Advanced competencies in managing healthcare organizations, navigating legal compliance, and strategic decision-making

Enhanced abilities in critical thinking, problem-solving, and effective communication within legal and health contexts

## Benefits

- 1 Dual Expertise:** Gain comprehensive knowledge in both health law and administration to stand out in two competitive fields.
- 2 Career Versatility:** Open doors to diverse roles, including healthcare compliance, hospital administration, policy advising, and legal consultancy within healthcare organizations.
- 3 Professional Advancement:** Better market yourself to hospitals and healthcare organizations, as well as firms that represent those entities.

## Fast Facts

- Health care is the largest segment of the economy. By 2032, healthcare products and services will account for 20% of the United State's GDP.<sup>1</sup>
- The demand for lawyers in the health-care sector is projected to grow 10% from 2021 to 2031.<sup>2</sup> The demand is also increasing for leadership positions in healthcare administration.<sup>3</sup>

<sup>1</sup> Centers for Medicare and Medicaid Services, 2024

<sup>2</sup> Bureau of Labor Statistics, 2024

<sup>3</sup> Becker's Hospital Review, 2024
