

MAY/JUNE 2025

# THE CANVAS CORNER

## New Quizzes - Text Block

### Summary

In New Quizzes, instructors are able to provide students additional context with standalone text or prompts that are not tied to questions on a New Quiz.

### Change Benefit

This update allows instructors to add sections to their quizzes that do not require a question to include instructions or other information to guide the student.

In addition, it also improves ease of migration from Classic Quizzes to New Quizzes.

The screenshot shows the 'Build' interface for a 'New Quiz'. At the top, there are three 'Menu item' labels. Below them, the 'Build' section is visible, with tabs for 'Item Banks' and 'Outcomes'. The main content area is titled 'New Quiz Title' and 'Instructions'. Below the 'Instructions' section, there is a 'Text Block' section with the title 'Add Text Block'. This section includes a 'Title' field (marked with a circled 1), a rich text editor (marked with a circled 2) with a toolbar containing options like 'Edit', 'View', 'Insert', 'Format', 'Tools', and 'Table', and a 'Text' field with a '12pt' dropdown and a 'Paragraph' dropdown. Below the rich text editor, there is an 'Item Bank' section (marked with a circled 3) with a dashed box containing the text 'Add to Bank'. At the bottom right, there are 'Cancel' and 'Done' buttons.

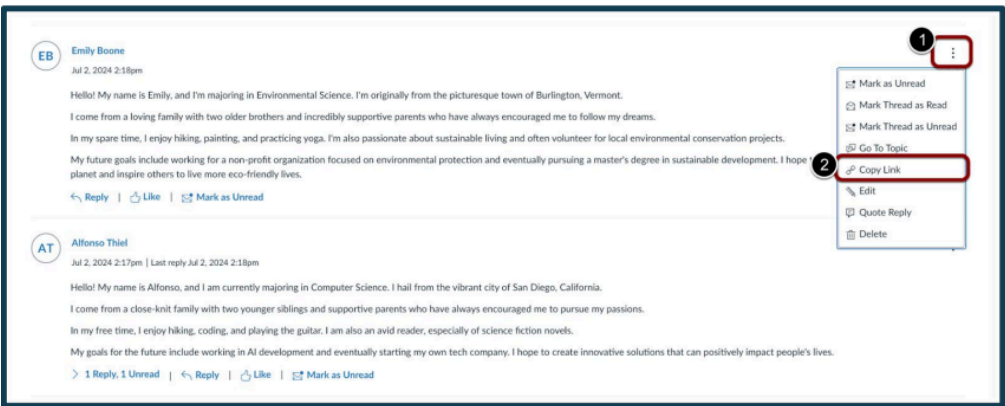

# Discussions - Permalink for Discussion Entries

## Summary

In New Quizzes, instructors are able to provide students additional context with standalone text or prompts that are not tied to questions on a New Quiz.

## Change Benefit

This update allows instructors to add sections to their quizzes that do not require a question to include instructions or other information to guide the student. In addition, it also improves ease of migration from Classic Quizzes to New Quizzes.

## New Quizzes

- Improved Navigation
- Course Nav and breadcrumbs visible during build, as well as the Moderate and Reports tabs
- Can choose to collapse the course nav menu.

Moderate page improved for real time accommodations during quiz taking

## Expanded Availability of Discussion Checkpoints

**Summary:** The Discussion Checkpoints Feature Option is also available at the Root Account and Sub-account level. Previously, this feature option was only available at the Root Account level.

**Change Benefit:** This update makes it easier for institutions to implement and manage Discussion Checkpoints in a way that best suits their organizational structure.

**Note:** The checkpoints feature option must still be enabled by your CSM

## New Quizzes: Student Analysis Report CSV Update

**Summary:** In the New Quizzes Student Analysis Report CSV:

- HTML processing is removed from answers.
- SIS data is available when instructors have the necessary permission.
- A Status column includes the following item state values:
  - Graded – The student answered the question, either correctly or incorrectly.
  - Not Graded – The question is awaiting grading
  - (applies only to Essay or File Upload questions).
  - Not Attempted – The question was not included in the student’s quiz.
  - No Answer – The student did not answer the question, but it was part of the quiz.
  - Not Supported – The question type is not supported by the Student Analysis Report.
  - N.A. – An error state indicating missing important data from the modal.

**Change Benefit:** This update streamlines the grading and review process, making it easier to interpret quiz data efficiently.
