Institutional Respondent Profile Report

About the Institutional Respondent Profile Report

This ***Institutional Respondent Profile Report*** provides an item-by-item description of the counts and percentages (both unweighted and weighted[1]) of all demographic survey responses for the Wake Forest University Campus Climate Survey. The listed demographic characteristics and all possible response options correspond to the survey instrument, survey dataset, and the survey codebook.

Counts and percentages are reported for the overall student sample. When between 1—5 responses were observed, we employ cell size suppression (indicated by --) to protect the confidentiality of respondents and minimize their identification. We indicate - when no responses were observed.

[1] The *Wake Forest University Campus Climate Survey Report* offers detailed information about the statistical weighting process employed.

Note. When < 5 responses were observed, we employ cell size suppression (indicated by --) to protect the confidentiality of respondents and minimize their identification. When no responses were observed, we indicate this by -. TGQN gender identity group = trans woman or man, genderfluid, genderqueer, questioning or unsure, agender, or nonbinary

[a] Respondents who selected Hispanic/Latinx were coded as such, regardless of any additional race specified. Respondents who selected multiple racial identities across Asian, Black, Native American/Alaska Native, Native Hawaiian or Other Pacific Islander, or White were categorized as multiracial. For all other racial categories, respondents were categorized as the singular race (non-Hispanic/Latinx) that they specified. [b] Respondents could select multiple responses, so total percentages can exceed 100%. [c] Item asked only for respondents who indicated disability status (n = 1,021)
