

LGBTQ RESOURCE GUIDE

Sexual Assault & Relationship Violence

Sexual assault and relationship violence affect every demographic and every community – including lesbian, gay, bisexual, transgender, queer, and questioning (LGBTQ) people. According to the Centers for Disease Control and Prevention (CDC), LGBTQ people experience sexual violence at similar or higher rates than non-LGBTQ people and may have unique barriers to accessing safety and services.

You are not alone: Statistics

Approximately 1 in 8 lesbian women (13%) and nearly half of bisexual women (46%) have been raped in their lifetime (NISVS, 2010)

Four in 10 gay men (40%) and nearly half of bisexual men (47%) have experienced sexual violence other than rape in their lifetime (NISVS, 2010)

64% of transgender people have experienced sexual assault in their lifetime (National Center for Transgender Equality, 2011)

44% percent of lesbian women, 61% of bisexual women, and 35% of heterosexual women experienced rape, physical violence, and/or stalking by an intimate partner in their lifetime (NISVS, 2010)

26% of gay men and 37% of bisexual men experienced rape, physical violence, and/or stalking by an intimate partner at some point in their lifetime (NISVS, 2010)
